Annual report to the shareholders

2024 infrabel.be

ANNUAL REPORT BY THE BOARD OF DIRECTORS
TO THE GENERAL MEETING OF SHAREHOLDERS ON 21 MAY 2025

This annual report was drawn up pursuant to Articles 3:5, 3:6, 3:65, 7:96, 7:203 and 7:220 of the Companies and Associations Code and Article 27 of the Act of 21 March 1991 on the reform of certain economic public companies. The report also contains the remuneration report drawn up pursuant to Article 17 §4 of the aforementioned Act. Pursuant to the provisions of the law and the Articles of Association, the Board of Directors has the honour of reporting to you on the company's situation and results for the 2024 financial year.

TABLE OF CONTENTS

EDITORIAL

2024, a significant year for Belgian railways

The year 2024 marks a decisive turning point for Infrabel with the adoption of our new corporate strategy, “5hift”, which embodies our vision for the future and our desire to contribute to the development of our country over the next 8 years. As the backbone of Belgium’s rail infrastructure, Infrabel promotes more sustainable mobility and supports the modal shift to rail. But our contribution goes much further: we are also fully involved in stimulating the Belgian economy, the energy transition, the protection of the environment, and the well-being and prosperity of our citizens.
We want to claim and fully assume this role in the service of our country. “5hift” therefore defines these 5 major challenges, but also our six main priorities (Safety First, ensuring reliability to improve punctuality, increasing the network’s potential, deploying resources efficiently, ensuring a positive environmental and societal impact, and encouraging collaboration and partnerships) and our 4 values of caring, reliability, positivity and courage. This annual report has been designed to embody our new strategy.

2024 also saw an improvement in rail punctuality. This success is the result of a number of measures designed to improve safety and punctuality, reflecting Infrabel’s and SNCB’s unfailing commitment to providing a reliable, high-quality service. Despite a similar number of incidents to the previous year, the impact of these on our services was significantly reduced, resulting in fewer minutes of delay. This result reflects our joint efforts, where every measure taken, from better incident handling to greater vigilance on the part of our staff, has contributed to the robustness of our network.

Finally, our commitment to safety has resulted in the development of concrete actions to improve safety at level crossings and reduce trespassing on the tracks, as well as the remarkable work of installing the ETCS system on more than 1,000 km of track, bringing the total number of tracks equipped to 79%. Infrabel also won this year’s “RailTech Innovation Award” for its “Mobile Balise Stop” emergency braking system, which acts as a protective shield for construction sites.

In 2024, our strategic vision and quest for innovation have guided us towards a future where safety, punctuality, sustainability and innovation converge to enrich the rail experience. I want to thank all of Infrabel’s employees for their constant commitment. I am convinced that, with this momentum, we will continue to progress, innovate and shape the future of rail in Belgium.

Benoit Gilson
Chief Executive Officer

ACHIEVEMENTS

1. OUR 5HIFT STRATEGY

The Go strategic plan ran from 2020 to 2024 and has, therefore, now come to an end. Its successor, the 5HIFT strategy, was given the go-ahead by the Board of Directors in April and brought a breath of fresh air. Building on the efficient industrial base and good operational practices that Infrabel has developed in previous strategic plans, 5HIFT opens up new perspectives for greater social impact. Infrabel not only plays a crucial role in shaping the mobility landscape but also contributes to meeting the various challenges facing our society: from climate change and the environment to the national economy, the transition to sustainable energy and the well-being of every citizen.

a. Our 5 5hifts

These five societal changes make up the Belgian shift - Mobility, Environment, Economy, Energy and Society - and are at the heart of Infrabel's new strategy. They are the driving force and the compass for decision-making, and they unite employees around an inspiring mission that has an impact.

1. **Mobility**
   We promote an ambitious modal shift, supporting rail transport as a key alternative for goods and people. Thanks to a safe, reliable and resilient rail network, we are playing an active part in ensuring that mobility is designed for the long term.

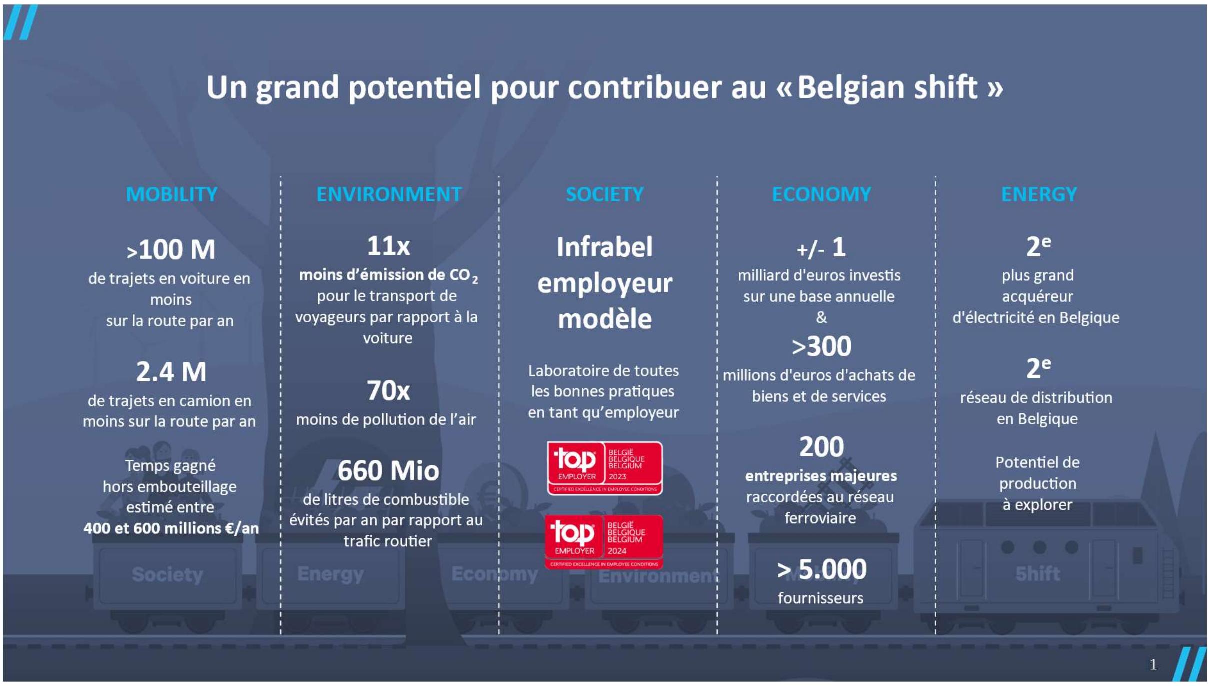
2. **Environment**
   The train remains one of the most sustainable modes of transport. By reducing greenhouse gas emissions and particulate matter, we are helping to limit the environmental impact of transport. In addition, we incorporate sustainable practices into our operations, such as reducing the use of pesticides and promoting the circular economy and biodiversity.

3. **Economy**
   Infrabel is an important partner for the Belgian economy. Our investments and activities create direct and indirect jobs and contribute to GDP while strengthening national logistics by connecting businesses and strategic platforms.

4. **Energy**
   Infrabel acts as a central purchasing office for traction electricity for the railways, making it a major player in the energy market. By focusing on the (local) production of renewable energy, we are supporting the transition to a more sustainable and independent future. What's more, our national low and medium-voltage infrastructure makes us a valuable partner for Belgian energy companies.

5. **Society**
   As a public company, Infrabel is firmly rooted in society. We are committed to promoting the well-being of every citizen by embracing diversity and inclusion. As one of the country's leading employers, we offer opportunities to everyone, whatever their background, and we enable everyone to learn and progress. What's more, rail is a fundamentally inclusive means of transport, accessible to all.

Through these 5 shifts, Infrabel is fully committed to building a more sustainable, inclusive and prosperous future for Belgium.



Major companies connected to the rail network: these are the production sites of major steel, chemical and food companies, quarries, assembly plants or sites of importers in the automotive sector, forestry companies, etc., spread throughout the country and with a direct connection to the rail network.

b. Strategic priorities and drivers

To implement our vision of the Belgian shift, we have defined six clear strategic priorities, which guide our efforts and our key decisions.

OUR PRIORITIES

<u>**'SAFETY FIRST'**</u>: Safety remains our top priority, covering train traffic, the safety and well-being of staff, subcontractors and third parties in contact with our activities. It also covers the protection of our infrastructure, materials and information.

<u>**'ENSURING RELIABILITY TO IMPROVE PUNCTUALITY'**</u>: Punctuality demands reliability. We are, therefore, working to systematically strengthen the robustness of our rail network in terms of both infrastructure and operations.

<u>**'INCREASING THE NETWORK'S POTENTIAL'**</u>: A modal shift inevitably leads to an increase in demand for train paths at a time when certain segments of the network are already at the limit of their capacity. We need to optimise the network for tomorrow's mobility needs and think about multimodal integration.

‘EFFICIENT DEPLOYMENT OF RESOURCES’: Infrabel operates with public funds. Therefore, we allocate our resources carefully to maximise their added value while respecting clear budget priorities focused on our core business.

‘PROMOTING ENVIRONMENTAL AND SOCIETAL IMPACT’: We amplify the sustainable benefits of rail through initiatives that promote the environment, diversity, inclusion, ethics and integrity.

‘ENCOURAGING COLLABORATION AND PARTNERSHIPS’: We cultivate proactive relationships with customers, suppliers and partners to co-create innovative and sustainable solutions.

OUR DRIVERS

To support these priorities, we rely on four strategic drivers. These are areas of expertise and contexts which are not objectives in themselves, but which Infrabel considers essential to promote so that the priorities can be achieved more efficiently and more quickly:

‘Expertise in the fields of digital technology and data’:
Data management is at the heart of our strategy. We guarantee their security, quality, reliability and accessibility so that we can make better decisions and share relevant information with our staff, customers and partners.

‘Ecosystem for Innovation’:
We are developing an inspiring and entrepreneurial environment conducive to innovation, underpinned by strong values, a clear process and a portfolio of innovations that is monitored and managed.

‘Committed and positive employees’:
Our employees are the key to our success. By enhancing their professional experience, supporting their development and valuing their contributions, we create a positive and motivating environment.

‘An organisation with stable processes and transparent governance’:
A stable framework based on clear responsibilities enables us to manage change effectively and achieve our objectives in an ever-evolving environment.

By putting these drivers at the service of our priorities, we are ensuring that we develop essential levers to achieve our mission.

c. Our values

To support our strategy and shape our corporate culture, we need solid foundations: our values.

Infrabel’s four values are essential points of reference, guiding the behaviour, attitudes and decisions of each of our employees on a daily basis.

Care:
Caring means we act with emotional intelligence in our relationships, our decisions and our actions. This means valuing differences and taking care of people, resources and the environment while cultivating a climate of mutual respect.

Reliability:
Being reliable means honouring our commitments, being authentic and setting an example for others. It also means keeping the common objective in mind while aligning our actions with the company’s priorities.

Positivity:
Adopting a positive attitude means looking for the best solutions while recognising the challenges. This includes openness to learning, evolving and collaborating, trusting in others, and a constant willingness to progress with enthusiasm.

Courage:
Courage means making transparent choices in the best interests of our customers and society. This means stepping out of our comfort zone, being open to criticism and accepting the consequences of our decisions.

These values underpin our collective commitment to achieving our strategic ambitions and strengthening our societal impact.

“//5hift Culture”, our new corporate culture

To bring these 4 values to life, Infrabel introduced the new “5hift Culture” in 2024.

To support the 5hift strategy, which shapes the company’s trajectory, clarifies its missions and priorities, and guides its tasks and decisions, it is essential that all employees share a common corporate culture.

Therefore, Infrabel has developed a “5hift Culture” to guide Infrabel employees through the behaviours they should adopt and the values they should live by within the company and with partners and customers. The ambition is to steer the culture towards 8 key behaviours that encourage collaboration, respect and the encouragement of change.

d. From strategy to implementation: how 5HIFT shapes our company’s views

In a period of constant change, it is essential that a long-term business plan can adapt and evolve with new developments. That’s why our strategy offers a flexible path within defined guidelines. Although our priorities generally point in the same direction, sometimes they require difficult choices. We strive to strike a pragmatic balance between safety, reliability, capacity, efficiency, sustainability and collaboration. The 5hift strategy helps us to take a stance on strategic dilemmas, such as whether or not to be ahead of the game with new, more expensive but environmentally-friendly technologies or to make savings. An in-depth analysis of each strategic issue, comparing it with the various priorities, enables Infrabel to remain coherent and to speak with one voice.

OUR PRIORITIES, AT THE HEART OF ALL MAJOR EVENTS

This chapter of the annual report provides a chronological account of the notable events of 2024 and links them to Infrabel's strategic priorities set out in the 5hift strategy.

- **Safety first**
- **Ensure reliability to improve punctuality**
- **Increase the network's potential**
- **Deploy resources efficiently**
- **Promote the environmental and social impact**
- **Encourage collaboration and partnerships**

Our 5hifts

- **Digital solutions and data**
- **Innovation ecosystem**
- **Positive, committed staff**
- **Stable processes and transparent governance**

1 JANUARY
ANTWERP MARSHALLING YARD OPEN TO RAIL COMPANIES

In 2023, the decision was taken to allow neutral operation of the Antwerp marshalling yard. This decision was the result of a collaboration between the Port of Antwerp-Bruges (PoAB), Railport Antwerp, Lineas and Infrabel. Since January 2024, these strategic facilities at the country's largest freight station have been available to all railway companies, including SNCF Fret, DB Cargo and Railtraxx.

Economy Energy

1 JANUARY
A NEW DEPARTMENT DEDICATED TO INTEGRATED AND ROBUST PROCUREMENT

In July 2023, Infrabel brought together all the teams involved in purchasing and supply in a single Procurement, Production, Supply Chain & Energy Management (PPSC) department.

The department was officially launched in January 2024 and now offers integrated services that best meet the company's needs.

This makes PPSC the driving force behind a reliable and resilient supply chain. The development of internal and external strategic partnerships will enable Infrabel to contribute to a competitive, sustainable and innovative rail ecosystem.

Society

3 January
Infrabel, Top Employer!

For the second year running, Infrabel was named a Top Employer. This label highlights the company’s sustained efforts in key areas such as strategy, the working environment, recruitment processes, training, development, well-being, and diversity and inclusion.

15 January 2024
Raising awareness of rail safety for the deaf and hard of hearing

Safety on and around the tracks is a priority for Infrabel. Following the tragedy at Solre-sur-Sambre, where 18-year-old Lucas did not hear the sound signal when the barriers of a level crossing were closed to announce the arrival of a train, Infrabel has launched an awareness campaign aimed at people who are deaf or hard . Through an educational programme developed with the help of a number of specialist organisations and Lucas’ mum, the youngsters get to know our railway infrastructure in a fun way.

Society

23 January
Mandatory certification to work on railway sites

Safety is in Infrabel's DNA. Aside from operational safety, we are also taking initiatives to improve the safety of the teams working on the tracks, whether our own employees or those of our subcontractors. In 2022, we launched "Safety Rocks" for them, an event in collaboration with the Union of Railway Contractors (UASW) and with the participation of NSA Rail Belgium and the Federal Public Service Mobility & Transport.
The 2024 edition took stock of a number of achievements, including, among others, the mandatory certification introduced at the start of 2024, the introduction of a safety communication platform, but also the assessment of contractors working in the safest possible way.

An exchange of views also took place with the participants on how to improve further.

The topic of safety is more than just accident figures and statistics. It is just as important to cultivate a safety culture to raise awareness within our own organisation and among our subcontractors. That's why, every year, we present the Safety Rocks Awards, both to the company's top managers and to some of our subcontractors who serve as role models.

7 February
Photovoltaics will soon power the 'Louvain-Liège' high-speed line

Solar energy powering trains directly... that's a first. Installed next to the Louvain-Liège high-speed line (L2), the Avernas photovoltaic park should be operational within 1 year. It will have more than 3,800 panels producing energy that will benefit nearly 500 national and international trains every week. This project illustrates Infrabel's determination, supported by the railway companies, to use energy to make rail transport ever greener.

On average, more than 350 national trains and 120 high-speed trains linking Belgium and Germany pass along this route every week. Another advantage of this plot of almost 3 hectares is its proximity to the Avernas traction substation, an Infrabel technical facility that transforms the energy from Elia's high-voltage substation to supply the entire railway line.

Avernas is the second site of its kind to be commissioned by Infrabel, following the Peerdsbos photovoltaic park that has been supplying power to the 'Antwerp-Dutch border' high-speed line since 2011. It represents an investment of around € 2 million, almost 90% of which is financed by a subsidy specially allocated to energy transition programmes by the federal government.

15 April
Infrabel invests in cutting-edge Belgian technology

Infrabel and Alstom signed an € 80 million contract to supply some 10,000 state-of-the-art train detection systems. These rail sensors are essential for safe and fluid traffic management. Developed in Charleroi, Belgium, these 'JADE 3' track circuits (CVs) are the latest to be used for train detection. It is thanks to these sensors, in particular, that signal box staff can remotely control rail traffic in complete safety.

These track circuits can have a major impact on punctuality. Their performance is important for traffic regularity. As a new-generation CV, JADE 3 offers a number of advantages over previous versions. It is less prone to faults than its predecessors and also has a diagnostic function for remote monitoring.

19 April 2024

Construction of the third and fourth tracks between Ghent and Bruges progresses step by step

On the railway line linking Ghent to the coast - the busiest line in Belgium - 250 trains run every day. Anticipating the increase in rail traffic in the years to come, Infrabel has been working since 2007 on the construction of a third and fourth track between Ghent and Bruges. The two existing tracks are also being renovated. Work is progressing in stages, and since April 2024, a third track has been in service between Bellem and Oostkamp. By the end of 2029, the four lanes between Ghent and Bruges will be completely finished.

16 May 2024

New action plan for safer and more punctual rail traffic

Trespassing on the tracks and incidents at level crossings represent a major risk of serious accidents and generate an average of more than 12 hours of delays per day. Infrabel has, therefore, launched a national action plan focusing on awareness, prevention and enforcement. The plan includes reinforcing infrastructure security, educational campaigns and working with the police to carry out targeted checks. These measures aim to improve punctuality and guarantee safety on the rails.

23 May 2024

Infrabel collaborates with Thales for advanced cybersecurity

Infrabel signed a five-year contract worth € 20 million with Thales to strengthen the cybersecurity of the Belgian rail network. This initiative is part of the European NIS 2 directive, which aims to harmonise and strengthen the level of cybersecurity within the European Union. Infrabel is also continuing to invest in IT talent and is recruiting 100 additional specialists to guarantee digital security, among other things.

Environment

7 June 2024

Strengthening the rail infrastructure to cope with the impact of climate change

Flooding and extreme weather conditions regularly damage railway tracks. Infrabel is implementing extensive measures to better protect the Belgian rail network against the increasing effects of climate change, as was the case this year on the line between Visé and Eijsden (Netherlands).

Preventive measures include raising the level of the rail beds, more efficient drainage systems and better protection of electronic equipment.

In addition to preventive infrastructure work, Infrabel is committed to sustainable solutions by investing in energy efficiency, green energy and a carbon-neutral network.

Society

12 June 2024
Infrabel conducts the first performance dialogue under its 2023-2032 performance contract

Infrabel's performance contract for 2023-2032 introduces a continuous improvement system with performance indicators and remediation plans to provide the government with a clear view of the infrastructure manager's performance. The performance indicators determine the bonus thresholds and remediation thresholds for the objectives that Infrabel must achieve. In 2023 and 2024, the Federal Public Service Mobility evaluated the performance of Infrabel and SNCB during an annual meeting called a "performance dialogue" and discussed improvements if targets were not met.

13 August 2024
Renovation of the Brussels-France high-speed line

In 2009, Infrabel completed Belgium's high-speed network, with connections to France, the Netherlands and Germany. The high-speed line 1 (LGV1) was the first to be brought into service in 1997 and will be renewed in phases starting in 2024.

The HSL1 links Brussels with Paris and London, and every day, around a hundred trains pass over the infrastructure.

To limit the impact on this heavily used rail infrastructure, it was decided to concentrate the renovation work over a limited number of weeks during the summer months of the next ten years. During these line interruptions, trains will be diverted via the conventional rail network, resulting in a limited increase in journey times. Thanks to this method, LGV1 will be completely renewed by 2035 for a total budget of € 310 million.

In 2024, over a period of 18 days and 18 nights, one of the two lanes was completely renewed over a 17.6 km stretch between Tourpes (Leuze-en-Hainaut) and Brugelette. This involved installing new rails, around 30,000 new sleepers and around 5,500 tonnes of ballast over 35.2 km. A special construction train was used for this renewal work. The train is over a kilometre long and has a 200-metre renewal unit at its centre. It pushes the rails apart, lifts the sleepers and sucks up the ballast, which is then filtered. In the same fluid movement, the train levels and ploughs the ground so that the new sleepers can be laid on top and the cleaned ballast can be spread. The rails are then repositioned. All this is happening at a speed of 180 metres per hour and for 12 hours a day. During this work period, high-speed trains were diverted via conventional lines, either via Mons (traffic to and from Paris) or via Ath/Tournai (traffic to and from London).

THURSDAY, 5 SEPTEMBER

A NEW VIRTUAL REALITY ANIMATION TO RAISE AWARENESS OF RAIL SAFETY

‘Zero deaths on the railways’: this is Infrabel’s objective as it continues to roll out its national action plan to improve safety and punctuality. One of the pillars of this plan, launched in February, is to raise awareness, particularly among young people.

For the start of the new school year, Infrabel has developed a new animation using virtual reality headsets for secondary school pupils.

The immersive 360° film features a group of teenagers who gather near the railway tracks for a picnic. One of the girls in the group wanders off to the side of the tracks and gets sucked in by a passing train. The viewer understands that she has died and will never be able to get together with her friends again... The animation is rounded off by 3 audio testimonials from young people whose lives have been turned upside down.

In addition to this VR animation, Infrabel has launched a new national awareness campaign to coincide with Mobility Week. Entitled ‘Not Spot’, it is broadcast on various channels and encourages Belgians to find ‘spots’ other than the railway to meet up with friends or go for a walk.

24 SEPTEMBER

INFRABEL AT THE HEART OF INNOTRANS 2024

From 23 to 27 September, Berlin played host to InnoTrans, the biennial trade fair for rail technology. It is a benchmark event in the railway sector and the most comprehensive event of its kind in the world. The entire railway sector comes to showcase its latest innovations.

Infrabel was represented at various levels at this crucial event.

For the first time in over ten years we exhibited again at the show as part of a partnership with the Walloon Export and Foreign Investment Agency (AWEX). The aim was to showcase some of our own innovations in the field of drones and virtual reality.

Our managers and experts also visited the site to discover trends and innovations that we can implement ourselves. As well as signing contracts with suppliers, InnoTrans was also an opportunity to strengthen our links with the Belgian industry and expand our network of companies active in the Belgian rail industry.

Economy

17 October
New bypass in the port of Ghent-Zeehaven

As the driving force of the Belgian economy, Belgian ports are a crucial link in the transport chain. Infrabel is, therefore, constantly investing in rail infrastructure in and to the ports, including the North Sea Port in Ghent. Infrabel and North Sea Port have launched a joint project for a ring road linking the dock's north and south quay tracks. Thanks to the peripheral track, freight trains from the Ghent-Zeehaven marshalling yard will be able to continue directly and be towed to the Kluizendok terminals. Located on the left bank of the Ghent-Terneuzen canal, the Kluizendok and 'Zandeken' rail links are used extensively for freight trains and are very important for the companies around the quay that rely on rail logistics. This part of the port is a hub of economic growth where many companies are investing.

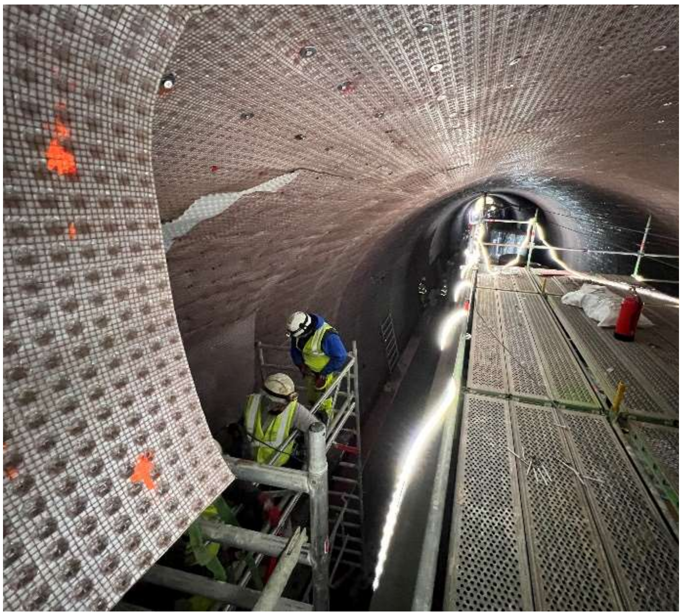
Work on the Ring Rail began in 2023 with the preparation of the subsoil and continues with the construction of rails and junctions. From 2025, the next stage will involve equipping the track and the rest of the Zandeken line with modern signalling. In total, Infrabel will have invested € 2.3 million and North Sea Port € 4.7 million.

24 October

An innovative anti-stalactite treatment in a railway tunnel

Ice formation poses a number of safety risks on the rail network, particularly in tunnels. Due to specific local conditions, around ten of them are subject to the formation of stalactites every winter. These sometimes measure several metres and represent a danger to trains and maintenance staff.

Infrabel decided to try out a new kind of specific anti-stalactite treatment. Infrabel's engineers have developed an innovative technique that is easier to implement than the existing method, which consists of completely re-waterproofing a tunnel by demolishing and then rebuilding its vault. They tested it on a few dozen metres of the Cheneux (Stoumont) tunnel, located between Liège and the Luxembourg border.



In practical terms, this new treatment involves laying a membrane with a fine mesh over the vault before coating it with mortar. This channels the water towards the foot of the tunnel and prevents it from forming ice clusters at the top.

4 November

Permanent closure of level crossings in Esneux

Approximately 3 years after bringing into service the new bridge over the Ourthe, a structure which has made it possible to eliminate the level crossing at Tilff station, Infrabel has officially closed 2 new 'rail-road' intersections at Esneux. With no fewer than 21 incidents or accidents (18 incidents and 3 collisions with a train) recorded over the last 20 years, the Colonster and Chemin de Halage level crossings were among the most accident-prone locations on the Belgian rail network.

This closure was made possible by the creation of a 600m-long bypass road leading to a bridge in Tilff crossing the 2 tracks. The investment in this project is around € 6 million, including € 1.3 million co-funded by the European Union.

Since its creation in 2005, Infrabel has removed more than 450 level crossings from the entire network. There are now around 1,600 of them left. These removals contribute to both traffic safety and punctuality.

17 November

Focus on rail safety: campaign for 1711 on 17/11

With its educational programmes and national campaigns, Infrabel aims to achieve zero fatalities on the railways. At the same time, the company is actively developing innovative technologies to enhance rail safety and prevent incidents. A new awareness campaign was launched on 17 November to promote the free emergency number 1711 for reporting dangerous situations at level crossings. Among the many technological initiatives is the installation of a 'Warning Box' at Pairi Daiza. This is an alarm system that warns users attempting to cross a closed level crossing.

12 December

Earn&Learn, a new language training project

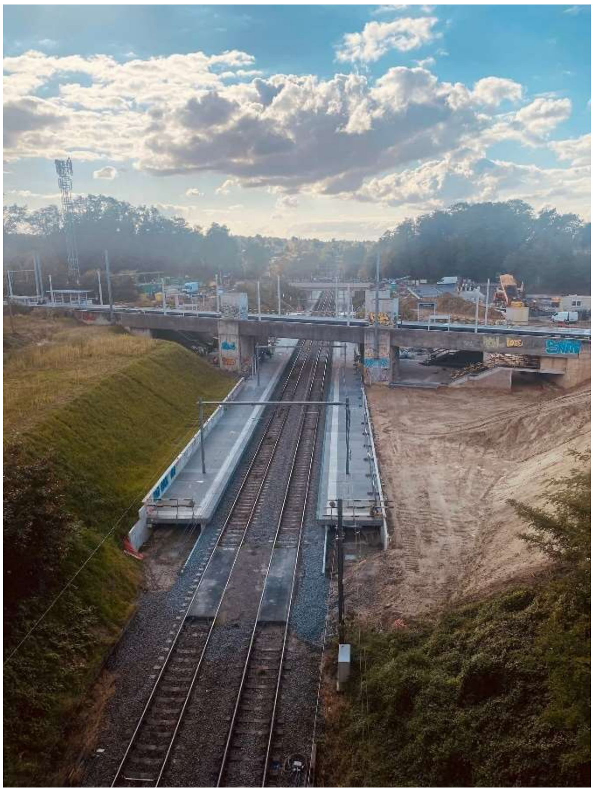
To help newcomers who are not native speakers of our national languages find work more quickly, Infrabel has launched ‘Earn&Learn’. This training project allows applicants to follow an in-depth, tailor-made Dutch course while already starting work at Infrabel.

Earn&Learn fits in perfectly with the Flemish government’s plan to strengthen integration policy by focusing on rapid and lasting employment for non-Dutch speakers and new arrivals. The programme is aimed at people with at least an A2 level of Dutch. Language level A2 is that of a person who has passed their civic integration exam and corresponds to a basic knowledge of oral and written language skills such as grammar, sentence structure and pronunciation. For example, being able to introduce yourself using a few short sentences, being able to read simple texts, understand simple briefings, etc.

A war for talent has been raging in the job market for several years. It’s especially technical profiles that many companies are looking to recruit.

This Earn&Learn project underlines Infrabel’s commitment to inclusion and diversity in the workplace. By offering language support and a clear career plan, Infrabel aims to integrate more people from diverse backgrounds into the rail sector.

13 December
Final stretch for work on the new multimodal hub at Uccle Moensberg



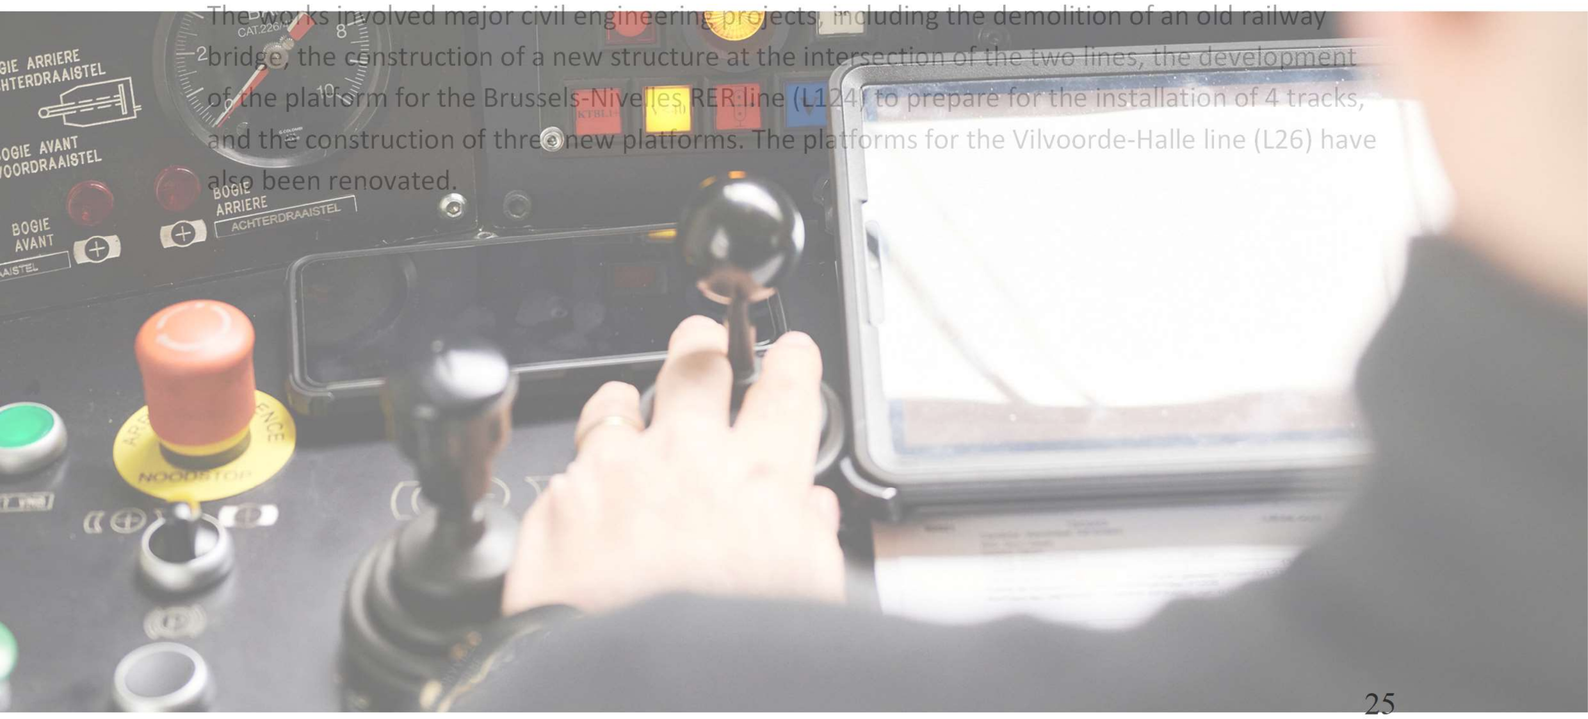
Construction work on the new multimodal hub at Uccle Moensberg enters its final phase. Located at the strategic intersection of the Vilvorde-Halle (L26) and Brussels-Nivelles (L124) lines, it forms part of the RER implementation cooperation agreement and is a flagship project for improving local and regional mobility and increasing the capacity of the rail network.

The new multimodal interchange at Uccle Moensberg will make journeys between the Vilvorde-Halle and Brussels-Nivelles routes considerably easier, as it will provide an immediate connection between the platforms of the two railway lines.

The project will significantly improve local and regional connections while increasing the capacity and fluidity of rail traffic.

Uccle Moensberg will thus become a model of an integrated multimodal hub thanks to a number of features: PRM accessibility with ramps, lifts and passageways adapted for people with reduced mobility, a car park and a kiss-and-ride zone for greater flexibility in journeys combining several modes of transport: train, bus, bike, car, etc.

The works involved major civil engineering projects, including the demolition of an old railway bridge, the construction of a new structure at the intersection of the two lines, the development of the platform for the Brussels-Nivelles RER line (L124) to prepare for the installation of 4 tracks, and the construction of three new platforms. The platforms for the Vilvoorde-Halle line (L26) have also been renovated.

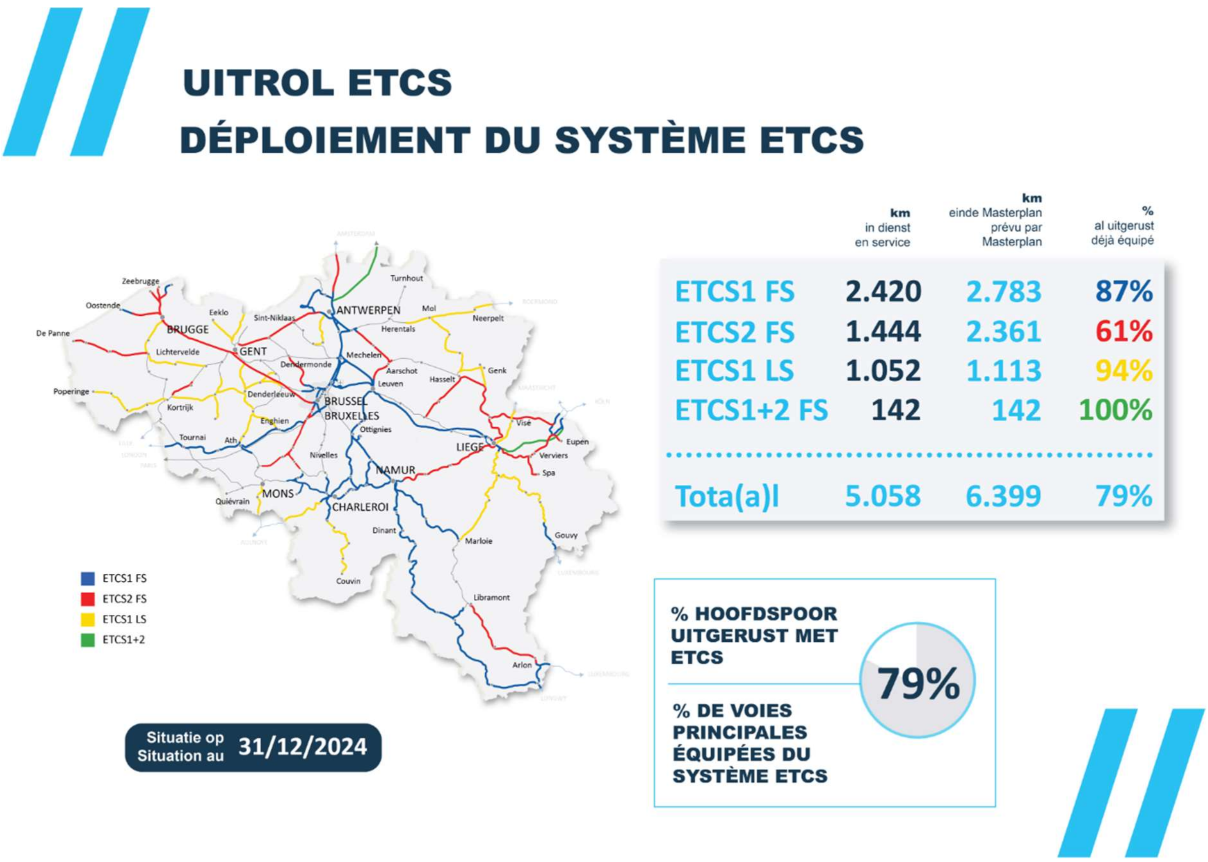


ETCS: 79% OF THE RAIL NETWORK EQUIPPED

2024 was a crucial year for the success of the ETCS Master Plan for a number of reasons. As a reminder, the ETCS (European Train Control System) constantly monitors the safety of the train's route and the maximum authorised speed, even taking over from the driver if they do not comply with the signalling.

First of all, in 2024, we successfully continued the industrial deployment of our ETCS migration strategy. The number of mainlines equipped has risen from 62% in 2023 to 79% in 2024. In terms of kilometres, this represents 1,085 kilometres of ETCS-equipped track added to the Belgian rail network in 2024.

Specifically for Level 2 Full Supervision, the Lichtervelde - De Panne pilot line was successfully commissioned on 31 March 2024.



ETCS is not just about safety but also about interoperability and connectivity across the European Union. Border points represent a challenge in this respect. In 2024, we succeeded in activating ETCS at the last three border points with neighbouring countries:
- L130A: ETCS1 LS at the border with France,

- L55 and L19: ETCS1 LS at the border with the Netherlands,
- L24: ETCS1 FS at the border with Germany.

Lastly, on 15 December 2024 we commissioned 258 km of ETCS Level 2 in a single weekend, which is a record for Infrabel.

By equipping these 1,085 additional kilometres of network in 2024 (compared with 720 km in 2022 and 512 in 2021), the entire network should be equipped by the end of 2025.

PUNCTUALITY IMPROVED IN 2024

Train punctuality improved in 2024, thanks to the implementation of concrete actions by both Infrabel and SNCB. These efforts throughout the year have resulted in a punctuality rate of 89.7%, excluding neutralisation in 2024, compared with 87.5% in 2023 (an improvement of 2.2%).

Measures taken by Infrabel and SNCB

While the number of incidents remains similar to 2023, their impact decreased significantly: 1,720,725 minutes of delay in 2024, compared with 1,975,889 in 2023.
This is the result of the joint efforts of Infrabel and SNCB, whose share in the causes of delays sharply declined.

The improvement in punctuality is mainly due to a series of measures that were taken, such as a better handling of incidents, improved staff awareness and attentiveness, minor adjustments to the robustness of the transport plan, and relatively favourable weather conditions (no heatwave, mild winter, etc.).

Impact of third parties...

Every day, trespassing and level-crossing incidents cause more than 12 hours of delays across the entire rail network.

In response, the rail operator has launched a national, multidisciplinary action plan based on 3 pillars: awareness, prevention and enforcement.

When it comes to raising awareness, the actions mentioned in the article '*An action plan for safety at level crossings*' (page 29) have also had an impact on punctuality. There's the new 1711 emergency number, for example, as well as the deployment of LED lighting on level crossing barriers and the installation of cameras.

In addition, a collaboration between Infrabel and the Federal Railways Police allowed police officers to be trained at the Infrabel Academy to improve the prevention of incidents on the railways and incivilities on the tracks.

Infrabel Academy opens its doors to police officers so that they can receive training in railway safety and the operation of infrastructure components under conditions that are as close as possible to the realities of the field.

These actions, taken in collaboration with the police to reduce the number of cable thefts, have also had a positive impact: the number of cable thefts was halved compared with 2023.

AN ACTION PLAN FOR SAFETY AT LEVEL CROSSINGS

In 2024, there were a total of 30 accidents at level crossings, resulting in 5 deaths and 9 serious injuries. In addition to the human tragedies, these accidents and incidents caused 44,721 hours of delays. The causes are failure to observe the highway code, carelessness and, to a lesser extent, weather conditions such as rain, fog or bright sunshine.

Faced with this situation, and together with the removal of a dozen or so level crossings each year, Infrabel is stepping up its initiatives.

The 1711 emergency number

There are still too many incidents at level crossings and on railway lines. These incidents can often be avoided by contacting Infrabel's Central Dispatch. To make this easier, Infrabel has set up a national emergency number: 1711.

This number allows anyone inside or outside the railway to contact Infrabel's Central Dispatch directly, which can then interrupt train traffic if necessary. Whether it's a car broken down on a level crossing, a tree threatening to fall/already fallen on the railway infrastructure or a lorry stuck at a level crossing, etc.

There are 1711 stickers on every level crossing post in Belgium so that everyone knows what to do in the event of an incident.

To make this number known to the general public, Infrabel launched a new national campaign on 17 November 2024 - a symbolic date (17/11) echoing the 1711 number - with the slogan: "Panic at the level crossing? Go on, call 1711!". The aim of the campaign was to raise awareness of the the number and how to use it.

As part of this campaign, Infrabel shared this message in the press and via various social media channels. Infrabel also provided targeted communication through our stakeholders (truck drivers, farmers, industry, etc.).

Lastly, since the start of 2024, Infrabel has been busy equipping around seventy level crossings with artificial intelligence cameras. This innovative device can automatically send an alert to the traffic management centre and stop a train if a vehicle or an individual comes to a standstill and there is a risk of collision.

Actions against trespassing

People trespassing on the tracks is a societal issue that goes beyond the responsibility of the infrastructure manager alone but which has a substantial impact on its organisation. The fight against intrusions on the rail network is the subject of a specific "trespassing" action plan based on identifying and securing hotspots located on rail property. It is based on 3 pillars (raising awareness, security and support for law enforcement).

Infrabel has made it a priority to secure sensitive points on the network identified through safety studies carried out every 4 years. In 2024, Infrabel carried out its 4th safety study, which involved monitoring the evolution of hotspots and identifying new potentially critical areas.

The security measures include a whole range of methods that have proved effective in pilot projects that were carried out by Infrabel and/or neighbouring operators (fencing, connected fencing, anti-intrusion mats, etc.). Their implementation is progressing thanks to the budgets allocated for this purpose.

To detect the presence of unauthorised individuals, Infrabel has equipped the ends of platforms at the stations and stops of Rhines, Morlanwelz, Bockstael and Ans with intruder detection cameras. A project that will be continued in 2025. Elsewhere, fences were placed. A total of 607m of fencing and gates were installed in 2024 to secure the hotspots in several areas (L-15 Herentals, L-35 Holsbeek, L-58/1 Ghent). In 2024, stations at Ruysbroek, Nessonvaux, Brugelette and Morlanwelz were also equipped with fencing between the tracks.

Raising awareness

To raise awareness among young and old of the dangers of walking on the tracks, Infrabel has launched the 'NotSpot' campaign. According to an Ipsos survey of 1,000 people carried out by Infrabel in February 2024, one person in ten admits to having walked their dog near the tracks in the last six months, and 23% of those surveyed believe that it is not dangerous to "hang out with your friends" near the tracks. In response to this type of risky behaviour, Infrabel launched a new rail safety campaign based on the Not Spot concept. The aim is to change dangerous behaviour on and around tracks and reduce the number of accidents. Infrabel made a video series showing that other places are much more pleasant than the edge of the tracks. And above all, that a change of attitude can save lives.

RECRUITMENT: ACTION ON ALL FRONTS

Our recruitment targets for 2024 remained ambitious: 665 positions were to be filled. Infrabel recruits a wide range of technical staff, including engineers, technicians, works supervisors, electrical mechanics, data analysts, signalling staff, etc. For these professions there is a shortage of applicants, especially in certain parts of the country where we are close to full employment.

Our teams succeeded in recruiting 628 new employees, representing 94.44% of our target. This number is in line with that of 2023. This is the result of tireless efforts by our company. Infrabel is one of the few Belgian companies to offer stable employment to both 18-year-olds and 58-year-olds.

Permanent media coverage

Throughout the year, 7 days a week, numerous campaigns were broadcast to the general public. These were, of course, used to publicise career opportunities but also to raise Infrabel's profile among the general public and the more specific profiles sought.

In addition to our poster campaigns, we also partnered with various media outlets. For example, on 16 April, RTBF's television news programme reported on Infrabel's recruitment of people over 50. They also aired several episodes of *Beaux Boulots,* a programme about jobs in short supply in Belgium - as did LN24. In Flanders, VRT 1 also highlighted railway sector careers with *Toffe Jobs*. Other examples include the programme *Héros de la nuit* (*Heroes of the Night*) and *Storms Staat Op* on MNM, aired on 8 March and 26 June, which honoured two female colleagues .
This year, we also focussed on optimising our digital campaigns.

Meeting (future) employees

Part of our recruitment strategy includes being on-site. In 2024, Infrabel organised 19 'InfraWelcome' Job Days throughout the year, across the country. We also continued trying to reach a younger audience by organising visits to our sites for students. The aim was to raise their awareness of the world of railways and awaken their enthusiasm for a career at Infrabel.

Employee ambassadors

Seeing that one in five CVs recommended by one of our employees leads to a hire, we decided to continue our internal referral campaign, 'Refer a Friend'. This initiative allows our staff to connect us with applicants from their own social networks. Additionally, a fun campaign was launched in October featuring a "made in Infrabel" cast, along with a specific internal competition in Ghent and Antwerp, where the war for talent is particularly fierce.

In 2024, 1,723 Refer a Friend introductions (compared with 136 in 2023 and 977 in 2022) were recorded, and at the end of the year, 179 people had taken up a new job in our company. We couldn't wish for better ambassadors for Infrabel than all those employees who encourage their acquaintances to join us!

Still Top Employer... for the second time

Last but not least, Infrabel was once again awarded the Top Employer label, joining over 2,100 organisations worldwide - including 90 in Belgium - that have received this recognition from the Top Employers Institute, the international authority on excellence in HR practices. This new certification recognises our efforts on numerous aspects such as strategy, working environment, recruitment, training and development, well-being, corporate culture, communication, diversity and inclusion, etc. We are confident that this acknowledgement will make Infrabel even more attractive!

A socially responsible company

Just like we did in 2023, Infrabel participated in the Viva For Life and De Warmste Week charity operations. Thanks to the initiatives of our teams, the prize pool reached 14,055 euros, all of which was donated to the beneficiaries.

3. KEY FIGURES

By the end of 2024, 12 recognised railway undertaking applicants were active in freight transport on the Belgian railway network: Lineas, CFL Cargo, Crossrail, DB Cargo Belgium, Europorte France, RailTraxx, SNCF Fret, HSL Belgium, RTB Cargo Belgium, Medway Belgium, TCA Rail and Certus Rail Solutions.
In addition ,one non-railway undertaking applicant active: Sibelit.
In the passenger transport sector, Infrabel had three railway undertaking applicants at the end of 2024: SNCB (national) as well as Thi-Factory and Train Charter Services (international).
Furthermore, 2 non-railway undertakings were also recognised for international passenger traffic: Eurostar (now inactive, having been created exclusively to facilitate the transfer of train paths as part of the merger of the Eurostar and Thalys activities into the Thi-Factory rail company), and European Sleeper, which operates night trains to Berlin and Prague in collaboration with Train Charter Services.
In total, Infrabel had 18 recognised applicants for freight and passenger transport by the end of 2024, of which 17 were active.

Number of effective train-kilometres

For the year 2024, the total number of effective train-kilometres[1] in all segments combined (excluding tourism associations[2] and notified entities) was 100.65 million. Compared to 2023, this represents a traffic increase of 2.09 %.

The number of effective train kilometres for the domestic passenger transport segment[3] (with the exception of tourism associations and notified entities) increased (2.34%) compared with the previous year at 85.01 million.

As far as international passenger traffic is concerned, the number of train kilometres has increased with 5.33 % compared to 2023, reaching 4.82 million train kilometres in 2024. This increase can be explained by the general expansion of the range of services offered by the various international passenger operators in our country to or from another major European city. Thanks to this traffic growth, we have returned to pre-Covid traffic volumes for market players already operating on our network in 2019.

In 2024, the number for the freight traffic segment fell slightly compared with 2023 (-1.17 %), reaching 10.82 million train kilometres (compared with 10.95 million in 2023). As was the case last year, this decrease can be explained by the downward trend in diffuse traffic and the conflict in Ukraine.

---

[1] An effective train-km is a train-kilometre actually travelled by a train on the network. A non-effective train-km is a train-kilometre reserved by an applicant but which has not been used.

[2] A tourism association is an organisation that benefits from a special status to carry out borderline routes on the railway infrastructure as part of the tourist activities it organises. Since 2017, however, there have been no tourist associations running on our rail network.

[3] Since 2021, the IC-Z connections with the Netherlands have been counted as national passenger transport. The figures for 2019 and 2020 have been calculated according to this logic.

The total amount of rail infrastructure fees (including tourist associations and notified entities) reached € 490.64 million[4] in 2024, versus € 468.29 million in 2023. This increase (+4.77%) is mainly due to price indexation (2.87%) and the increase in international passenger traffic to and from Belgium.

For 2024, the amount relating to Congestion Risk Prevention Tariffs (CRPT) is € 1.46 million, an increase of 115.60% from last year. This significant increase can be explained by the reduction in the discount granted to operators for this tariff (50% instead of the 75% previously granted in 2023), and also by the increase in the number of "long-term parking" type occupancies (+57.82%) in the areas concerned. Remember that these tariffs are designed to optimise the use of operational tracks (VOS) in our network's busiest yards.

Customer-focused strategy

In terms of quality, Infrabel is pursuing its customer-focused strategy.

The objectives of this strategy include:

- improving our knowledge of each of our partners, whether they are passenger or freight railway companies, ports, terminals or industrial connections,
- meeting market expectations as effectively as possible,
- strengthening our links with Belgian economic players, so that we can be a genuine partner for them in mobility and transport, promoting economic development, and
- creating a community of customers within which fluid and transparent communication takes place.

Several specific actions have been taken. As it does every 2 years, Infrabel carried out a customer satisfaction survey in 2024, the results of which will guide our actions in 2025.

Overall satisfaction has risen from 6.1/10 in 2020 to 6.7/10 in 2024. The strong points highlighted by our customers are the clear communication of our strategy (strategic plan, investment plan, etc.) and the positive approach of our employees to customer relations.

We are continuing our efforts to strengthen this customer focus, and in 2024 we will be organising another edition of the 'Customer Month' campaign. The first one was carried out in 2022 and gave customers the opportunity to visit three strategic Infrabel sites.

To find out more

All the key figures are available on the website by clicking on: **Infrabel | Open Data**

[4] Including the subsidy granted to operators in the freight segment of € 1.20/effective train kilometre as part of the application of the Royal Decree of 18 October 2022. This amount also takes into account the subsidy for night trains, the conditions of which are set out in the Royal Decree of 28 November 2023.

4. IMPORTANT EVENTS THAT OCCURRED AFTER THE END OF THE FINANCIAL YEAR

On 3 February 2025, the new federal government was sworn in by the King. In the coalition agreement, the government confirms that rail transport is one of its main missions and that it is essential for passenger and freight transport.

The government reaffirms Infrabel's performance contract, as well as the projects set out in its multiannual investment programme, and is providing the necessary resources.

The government would like SNCB to adapt its train services to the real needs of passengers, with priority given to reinforcing busy lines and limiting the number of stops in areas of low demand. It is worth examining whether this could have an impact on the infrastructure charge levied by Infrabel.

In addition to its regulated activities, the government wants to allow Infrabel to develop closely related commercial activities, such as producing energy for recharging electric buses and supplying electricity to surrounding buildings. These activities must be ancillary and subordinate to the public service and must not have a negative influence.

5. Circumstances likely to have a considerable impact on the company's development

Infrabel is facing various **circumstances** arising from **political, economic, social, technological and environmental** factors. These risks are often interconnected, which can lead to increased uncertainties and challenges for our long-term objectives and the implementation of the performance contract with the government.

Liberalisation of domestic rail passenger traffic

Driven by the EU, the further liberalisation of domestic passenger traffic in Belgium by 2032 also poses challenges, requiring a timely strategic response.

Global geopolitical situation

With conflicts and tensions in regions such as Ukraine and the Middle East, the global geopolitical situation is putting pressure on global power relations and can have an impact on the global supply chain, raw materials, freight traffic and energy prices. The threat of international trade wars and protectionism following the US presidential election reinforces this risk.

Climate change

In terms of **adapting to climate change**, with extreme weather conditions, for example, we need to adapt our infrastructures to ensure their resilience and reliability.
As for mitigating global warming, new constraints and opportunities will arise for the rail system with, for example, the replacement of diesel trains and improvements in the energy consumption of both our facilities and electric trains.

Technological progress

Technological advances such as **automation and digital innovations** are essential for the rail sector. Automated train control and signalling are key factors if we wish to remain competitive.

European developments

European developments such as the Belgian Presidency of the Council and the European elections are influencing policy and investment in rail infrastructure. Infrabel participates in initiatives to improve transnational rail services.

High demand and saturation
With the development of rail traffic in various segments: national passenger traffic, conventional international traffic, both high speed and sleeper, as well as freight traffic, some railway lines, stations and/or junctions face capacity problems.

In the preparation of the timetables for 2024 and 2025, it wasn't until the end of certain coordination procedures that Infrabel was able to reach an agreement with the applicants on the proposed alternative train paths.

Infrabel has, therefore, had to declare certain parts of its infrastructure to be saturated at certain times of the day at Ghent-Saint-Pierre station, on line 25 between Vilvoorde and Mechelen, on line 12 between Y. Sint-Mariaburg and Y. Luchtbal and on line 167 between Y. Athus-Nord and Y. Autelbas.

Consequently, to decide between the requests, Infrabel applied the priority criteria set out in the Royal Decree of 19 July 2019 on the allocation of railway infrastructure capacity and the railway infrastructure charge.

In accordance with the Rail Code (Article 41), capacity analyses and plans to increase capacity must be drawn up within 6 months of the declaration of saturation, in order to combat congestion. This capacity analysis is followed by the presentation of a draft capacity-building plan to be discussed by the Council of Ministers and, once approved, laid down in a Royal Decree. The reinforcement plan following the declaration that Ghent-Saint-Pierre station was saturated, was approved and led to the publication of the Royal Decree of 12 December 2024.

Capacity analyses for infrastructure declared saturated following the final offer 2025 are currently being studied.

Although Infrabel can propose solutions to capacity problems, they are currently beyond its control because the railway companies themselves are responsible for submitting their capacity requests to the infrastructure manager. Infrabel's performance contract and the European timetable redesign project (TTR; Time Table Redesign), currently under trilateral discussion, foresees that, by 2030, the infrastructure manager will be able to define a capacity strategy (and therefore, a catalogue of train paths) based on the needs expressed by rail operators.

Loan from the Debt Agency

The performance contract takes into account structural refinancing of the infrastructure manager, but also financing at the expense of Infrabel via an additional loan of up to € 1 billion over the period 2025-2029, allocated to investments in major projects that will benefit mobility. These include financing the completion of the RER and Axis 3 (Ottignies-Luxembourg border) projects, extensions to the ports (Brussels, Ghent, Antwerp) to support the Modal Shift, and the upgrading of line 50A Ghent-Bruges to 4 tracks.
On 24 October 2023, Infrabel's Board of Directors approved a € 1 billion credit line and decided to activate the loan in instalments, consisting of a first instalment of € 800 million that can be activated from 2025 and a second instalment of € 200 million. The Board of Directors reserved the right to confirm whether or not to activate this final instalment.

On 26 November 2024, Infrabel's Board of Directors approved the early repayment of € 100 million of the first 2025 instalment and decided to borrow it at a later date. Infrabel's Board of Directors has not yet decided whether or not to activate the second instalment of € 200 million. "

Cyber threats

They also represent a considerable risk, requiring investment in cyber security and critical infrastructure protection, especially given the growing importance of military transport by rail.

6. Risks to which the company is exposed

Infrabel is currently involved in several major legal disputes, mainly resulting from train accidents and contractor claims, and has made the necessary provisions for this purpose.

If the number of passengers over a 12 month period remains significantly below expectations and if several other contractual conditions are met, the private investor of the Diabolo project has a contractual right to terminate the public-private partnership (PPP) prematurely.
The private investor also has the right to request an adjustment to the passenger surcharge if the number of passengers over a 6 month period is less than 85% of the initial estimates (or if it can reasonably be expected to be less). The last adaptation was made on 1st February 2023.
Since then, passenger numbers have increased, and this positive trend continued in 2023 and 2024.
At present, not all the contractual conditions required for early termination of the contract have been met.
Given the increase in the passenger supplement on 1st February 2023, the private investor is, in principle, not entitled to request an increase in the passenger charge for a period of three years following that date.

Infrabel may face difficulties in obtaining the permits required to carry out its projects and may also risk appeals against these permits. If these risks materialise, they could delay the completion of the projects concerned and complicate compliance with the investment distribution key in the Flemish and Walloon regions.

7. INNOVATION

To meet its various challenges, Infrabel relies on stimulating innovation in its various disciplines.

In particular, it relies on diversified networks to identify and access the best options being developed. Thanks to its membership in several international organisations of infrastructure managers and railway companies, Infrabel is able to keep an eye on international innovations resulting from research and development programmes.

Infrabel is also building an inspiring and entrepreneurial ecosystem in-house. It encourages the development and implementation of its own innovations, which it deploys across its network.

As for collaborations with external companies, in 2024, Infrabel won the "RailTech Innovation Award" in the "Technology & Design" category with the "Mobile Balise Stop". This mobile device, a European first, ensures the safety of people working on the tracks. It was developed by Infrabel in collaboration with Alstom and Zöllner Signal GmbH.

8. Subsidiaries

The Infrabel Group relies on the expertise of almost 10,000 employees spread across various entities. Each plays a specific role in the management, maintenance and development of the Belgian rail network.

Our legal structure is as follows:

At the end of 2024, Infrabel has a majority stake in five subsidiaries:

- TUC RAIL SA, active in the field of rail track studies and rail infrastructure works ;
- SPV Brussels Port SA;
- SPV Zwankendamme SA;
- SPV 162 SA[5].

In December 2024, the stake in the Centre de Créosotage de Bruxelles SA was sold, also terminating the indirect stake in Woodprotect Belgium NV.
Infrabel owns various shareholdings in:

- HR Rail SA, under public law, which, in accordance with the Royal Decree of 11 December 2013, is the legal employer of all staff members;
- Greensky SA produces alternative energy using wind turbines;
- SPS Fin SA produces alternative energy using solar panels.

Infrabel is a member of four European Economic Interest Groupings (EEIGs):

- the EEIG Rail Freight Corridor North Sea-Mediterranean;
- the EEIG Corridor Rhine-Alpine;
- the EEIG North Sea-Baltic Rail Freight Corridor;
- the EEIG ERTMS Users Group.

The purpose of these EEIGs for the corridors is the promotion and development of rail freight traffic. The EEIG ERTMS Users Group is made up of European rail infrastructure managers who wish to implement ERTMS/ETCS in a harmonised, interoperable way.

Via HR Rail SA under public law, Infrabel also has an indirect stake in Rail Facilities SA, which carries out procurement activities for the serving and retired staff of Infrabel, SNCB and HR Rail, as well as their family members.

Infrabel is an effective member of several A(I)SBLs (national or international non-profit associations):

[5]The three SPVs are project companies created by the ex SNCB-Holding as part of the Regions' pre-financing of several investment projects.

- The ASBL Liège-Carex, which carries out studies for the construction of a trimodal terminal (air, TGV and road) at Liège Airport, and thus indirectly a member of Eurocarex AISBL, which is working on the creation of a high-speed rail freight network with connections to the airport hubs of EU Member States
- BENOR ASBL, which is active in the field of certification and quality assurance of (reinforced) concrete.
- PROCERTUS ASBL, an association that aims to promote the quality of construction products and related processes and services on the Belgian market, with an emphasis on durability and sustainability. In 2024, the non-profit associations BE-CERT, OCAB-OCBS and PROBETON were merged into PROCERTUS ASBL.
- RailNetEurope (RNE) ASBL, under Austrian law, an association of rail infrastructure managers, allocation bodies and rail freight corridors, which aims to promote and facilitate the international aspect of the operational activities of infrastructure managers.
- European Rail Infrastructure Managers (EIM) INPO, an international association of European rail infrastructure managers whose aim is to improve and develop the European rail infrastructure, stimulate the development of a European rail network, represent the interests of its members vis-à-vis the European institutions, and provide a platform for the rail infrastructure managers.
- Bewag, the trade association for various actors in the freight wagon industry, which serves as an information channel between the European authorities and its members.
- Agence Ecosphère, ASBL under French law, which brings together various public (including the SNCF) and private companies active in the railway sector and focused on innovation, primarily in the field of railway logistics equipment
- Be.Face ASBL is a network of companies working together to promote the social and professional integration of disadvantaged people through concrete local initiatives and in collaboration with actors on the ground.
- The Shift ASBL, the Belgian platform for sustainable development, which is the national contact point for the World Business Council for Sustainable Development (WBCSD) and CSR Europe.
- Voka ASBL, a network of Flemish companies.
- Voka Metropolitan ASBL, a network of companies in the Brussels metropolitan area created to promote, among other things, collaboration between the Flemish Region and the Brussels-Capital Region.
- AKT ASBL, formerly known as UWE ASBL, a business organisation in the Walloon Region.
- BECI ASBL, a business organisation in the Brussels-Capital Region.
- CERRE ASBL, an association that aims to contribute to improving the quality of regulation, particularly in the energy, sustainable development, technology, media, telecommunications and mobility sectors.
- OpenRail AISBL, an association whose aim is to create a collaborative space for innovation with the mission of promoting the creation of digital solutions for the rail sector based on open-source software.

Below is an overview of Infrabel's[6] shareholdings and memberships, with the percentage held or represented.

Company			Percentage Infrabel
	Direct	Indirect	Total
TUC RAIL SA	100.00 %		100.00 %
SPV 162 SA	100.00 %		100.00 %

Non-recurring financial income	-0.44	0.73
EARNINGS BEFORE TAX (EBT)	**54.29**	**50.81**

[7] Including revenues related to the congestion risk prevention tariff

A number of events occurred during the 2024 financial year. These are explained below in order to allow a good understanding of the annual financial statements:

- As part of the performance contract signed in 2022, the State granted Infrabel an additional operating grant for 2024 of € 74.0 million$_{2023}$ to give it the necessary resources to carry out its operating activities.
- The mechanism launched in 2022 to encourage rail freight transport also led to a loss in the infrastructure charge in 2024 (€ 21.0 million, of which € 10.1 million consisted of additional aid relating to 2023, which was only allocated in 2024). However, this reduction in infrastructure fees was offset by a subsidy. In 2023, a similar mechanism was created for night train journeys on the Belgian rail network from 1st January 2023 to 31st December 2024. The loss of revenue of € 0.6 million was compensated by a subsidy.
- In 2024, Infrabel sold its stake in the CCB subsidiary. The sale generated a capital gain of € 1.9 million.
- In 2021, Infrabel was confronted with two floods. In 2024, further repair work was carried out, as it had not been possible to complete all the work in previous years. Operating costs of € 0.8 million were recorded as non-recurring operating costs, and investment costs of € 0.7 million were recorded as tangible fixed assets. Repair work is also planned for 2025, at an estimated cost of € 0.5 million, with the remainder, estimated at € 2.2 million, to be repaid to the Belgian State. This amount was recorded under other liabilities. Infrabel is insured for incidents of this type and has already received € 25 million from insurance companies. The Belgian government will cover any remaining costs and has received € 87.7 million from the European Union Solidarity Fund for flood damage in Belgium. In 2021, the Belgian State paid Infrabel € 63.2 million in pre-financing. In 2023, Infrabel paid back € 20.6 million of this amount to the Belgian State.

REBITDA

The 2024 financial year closed with a REBITDA of € 93.7 million, compared with € 91.2 million in 2023, an increase of € 2.5 million.

This change can be explained by:

- a reduction in operating costs of around € 3.9 million (-0.2 %),
- partly offset by a reduction in operating income of approximately € 1.4 million (-0.1%).

The reduction of € 3.9 million in operating costs can be explained by the following elements:

- a decrease in other purchases of miscellaneous goods and services of € 66.6 million, mainly due to the reduction in traction and distribution energy costs as a result of lower electricity prices, and
- a reduction in other operating expenses of € 1.2 million,
- partly offset by an increase in personnel costs of € 33.8 million, and,
- an increase in the consumption of supplies and goods of € 30.1 million.

The € 1.4 million reduction in operating income can be explained by:

- a decrease in miscellaneous sales of € 58.6 million, mainly as a result of invoicing for traction and distribution energy due to lower electricity prices,.
- a reduction in government subsidies of € 23.0 million, and,
- a decrease in the change in inventories of work in progress and finished products of € 0.5 million,
- partly offset by an increase in capitalised production of € 57.5 million,
- an increase in the infrastructure charge of € 12.9 million, of which € 19.4 million related to national passenger traffic, € 2.2 million related to international passenger traffic and € -8.7 million to freight traffic,
- an increase in orders in progress of € 9.6 million, and,
- an increase in other operating income of € 0.7 million.

EBT

The result of non-recurring operations was € 9.1 million compared with € -4.8 million in 2023.

Depreciation and costs of impairments and provisions amounted to € 826.3 million, which is an increase of € 46.3 million compared to 2023. Depreciation rose by € 20.3 million. Impairment charges fell by € 8.3 million, mainly due to lower write-downs on inventories. Costs linked to provisions increased by € 34.2 million, mainly as a result of an increase in the level of personnel provisions.

The recurring financial income amounts to € 773.5 million, an increase of € 25.2 million compared to 2023. It includes, on the one hand, recurring financial income of € 881.1 million, of which € 794.9

million relates to depreciation on investment grants, € 47.2 million to interest subsidies and dividends, € 38.8 million to interest received and € 0.2 million to other financial income, and, on the other hand, recurring financial costs of € 107.6 million, of which € 101.6 million are charges arising from debts, € 5.5 million are other financial costs and € 0.5 million are impairments on other receivables.

The non-recurring financial income amounted to € 0.7 million.

The 2024 financial year therefore closed with overall earnings of € 50.8 million before tax (EBT) (2023: € 54.3 million).

3. BALANCE SHEET

ASSETS (in € million)	2023	2024
I. Start-up costs	0.00	0.00
Fixed assets	**21,203.33**	**21,676.28**
II. Intangible fixed assets	1,374.74	1,383.13
III. Tangible fixed assets	19,793.73	20,262.22
IV. Financial fixed assets	34.86	30.93
Current assets	**3,718.62**	**3,808.30**
V. Accounts receivable after more than one year	1,445.74	1,359.10
VI. Stocks and contracts in progress	313.46	318.79
VII. Accounts receivable within one year	381.19	428.20
VIII. Cash investments	709.06	512.22
IX. Cash	263.32	606.61
X. Accrued charges and deferred income	605.85	583.38
TOTAL ASSETS	**24,921.95**	**25,484.58**

LIABILITIES	2023	2024
Shareholders' equity	**19,461.16**	**19,955.97**
I. Capital	770.08	770.08
II. Share premium	299.32	299.32
III. Revaluation surpluses	55.16	55.13
IV. Reserves	17.17	17.17
V. Profit/loss carried forward	-73.44	-19.16
Profit (loss) to be appropriated	54.29	50.81
VI. Investment grants	18,338.58	18,782.62
Provisions	**234.39**	**251.67**
VII. Provisions	234.39	251.67
Debts	**5,226.40**	**5,276.94**
VIII. Accounts payable after more than one year	2,824.32	3,365.75
IX. Accounts payable within one year	1,142.32	708.06
X. Accrued charges and deferred income	1,259.76	1,203.13
TOTAL LIABILITIES	**24,921.95**	**25,484.58**

Infrabel’s balance sheet total on 31/12/2024 was € 25,484.6 million, an increase of € 562.6 million compared with the previous year (+ 2.3%).

The balance sheet structure is characterised by a substantial share of fixed assets (€ 21,676.3 million). These are mainly tangible fixed assets (€ 20,262.2 million), as well as intangible fixed assets (€ 1,383.2 million), including the operating rights and financial fixed assets (€ 30.9 million).

The € 476.9 million increase in the tangible and intangible fixed assets is due to investments of € 1,288.9 million made in 2024. This increase was partly offset by depreciation and impairments on the fixed assets and by fixed assets being decommissioned and sold for € 812.0 million.

Within these tangible fixed assets, an amount of € 3.6 million was recorded, which was paid to TUC RAIL as an advance on investment works and drawn from the investment grants.

The remaining assets consist of current assets (€ 3,808.3 million), which are made up of € 1,787.3 million in receivables, € 1,118.8 million in cash investments and cash equivalents, € 583.4 million in accruals and deferred income and, finally, € 318.8 million in inventories and contracts in progress.

The increase in current assets of € 89.7 million was due to an increase in cash at bank and in hand of € 343.3 million, in receivables due within one year of € 47.0 million, and, inventories and orders in progress of € 5.3 million, partly offset by a decrease in cash investments of € 196.8 million, long-term receivables of € 86.6 million and accruals of € 22.5 million. Since the end of March 2024, it has no longer been possible to invest securities available from the Federal Debt Agency in treasury investments at 48 hours’ notice, which has led to a significant transfer from treasury investments to available securities.

Liabilities consist of shareholders’ equity (€ 19,956.0 million), comprising € 18,782.7 million of investment grants, provisions (€ 251.7 million) and debts (€ 5,276.9 million), of which € 3,365.7 million is (gross) long-term debt, € 708.1 million is short-term debt, and € 1,203.1 million is accrued charges and deferred income.

Shareholders’ equity increased by € 494.8 million due to a € 440.0 million rise in investment grants and the result for the financial year of € 50.8 million.

Provisions fell by € 17.3 million, mainly as a result of an increase in provisions for pensions and similar obligations.

The increase in debts of around € 50.6 million is the result of the € 541.4 million increase in long-term debts, partly offset by a decrease in short-term debts of € 434.3 million and accruals and deferred income of € 56.6 million. The increase in long-term debt and the decrease in short-term debt are mainly due to the long-term refinancing of a € 500 million short-term debt, which was due to mature in 2024.

The decrease in accruals and deferred income is mainly due to the lower discounting of receivables from the State relating to the Diabolo PPP and the Liefkenshoek Rail Link PPP following the reduction in the nominal amounts of these receivables.

4. APPROPRIATION OF EARNINGS

The earnings to be appropriated amount to:	
Result from the financial year for appropriation	€ 50,812,709.18
Result carried forward from the previous financial year	€ -19,155,387.29
Earnings for appropriation	€ 31,657,321.89

The Board of Directors proposes the following appropriation of the earnings:	
Transfer to legal reserve	€ 1,582,866.09
Carry forward to the next financial year	€ 30,074,455.80

5. Risks and uncertainties linked to the use of financial instruments

Infrabel applies active risk management to control liquidity, currency, interest rate and credit risks. For this purpose, it has formulated a financial policy, approved by the Board of Directors, in which this risk management is strictly regulated. In 2019, the financial policy was adapted to the rules that apply to entities consolidated with the Belgian government, given that Infrabel has been consolidated with the Belgian government since 19 October 2018.

Forward contracts and derivatives may be used in order to manage the financial risks. Infrabel makes use of the interest rate and currency swaps as part of its hedging activities for interest rate and exchange rate risks.

Transactions that involve interest or currency exchange rates must be linked to an underlying commercial transaction.

LIQUIDITY RISK

When debt is contracted, the expected evolution of future cash flows is taken into account in order to balance the incoming and outgoing cash flows. Cash investments and loans must be matched as far as possible to neutralise internal risks. In addition, liquidity risk is offset by staggering debt maturities over time.

CURRENCY RISK

All borrowing involving a currency risk must be fully hedged. If a currency risk arises in the context of operating expenditure or investments, the maximum outstanding risk is limited to the equivalent value of € 100,000 per currency where it concerns USD, GBP or CHF. For all other foreign currencies combined, the outstanding risk is limited to the equivalent value of € 100,000.

INTEREST RATE RISK

The portion of the total debt financed at variable interest rates is subject to the risk of changing interest rates. The financial policy approved by the management bodies of the company allows a level of financing at variable rates of up to 40% of the total long-term debt. The current debt structure is well within the parameters of this policy. If necessary, conversions from variable rate to fixed interest rate positions are carried out by using interest rate swaps. In addition, a substantial proportion of the outstanding debt is covered by Belgian Government commitments towards Infrabel.

CREDIT RISK

Following Infrabel's consolidation in the State accounts on 19 October 2018, all available cash must be placed in a Federal State account (account 679) with the institution designated by the Federal State (Bpost).

Other liquid assets may be invested in financial instruments issued by the Federal State. This minimises counterparty risk.

For derivatives, the credit risk from the counterparties must be spread and covered systematically by a "collateral" liquidity reserve governed by Credit Support Annex (CSA) agreements. For agreements of this type, regular calculations are made of the net amount owed, either by Infrabel or by the counterparty, if the total amount of the derivative agreements concluded between the parties were to be cancelled at current market value, and whereby the credit risk is limited to a maximum amount depending on the credit rating of the counterparty.

In principle, Infrabel is also exposed in the normal course of its business to credit risks on trade and financial receivables. However, the credit risk on trade and other receivables is low, since the main debtors are the Belgian Government and the incumbent rail operator.

6. AUDITORS' ADDITIONAL ASSIGNMENTS

During the 2024 financial year, an additional assignment was entrusted to the auditors. More specifically the writing of a special report intended for the FSMA on compliance with the obligations arising from Regulation 648/2012, dated 4 July 2012 (the 'EMIR Obligation'), for an amount of € 5,985.04. A tax consultancy assignment was also carried out for € 5,988.50.

CORPORATE GOVERNANCE

This chapter aims to explain the Corporation's rules of operation in light of the principles of Corporate Governance.

1. BOARD OF DIRECTORS

MEMBERS

The Board of Directors is composed as follows:

Mr Jan CORNILLIE	Chairman of the Board
Mr Benoît GILSON	Chief Executive Officer
Mr Herman DE BODE Mr Antoine DE BORMAN Mr Pier ERINGA Ms Anne-Sophie GILLAIN Mr Ruben LECOK Ms Brigitte PINTE Ms Sylvianne PORTUGAELS Mr Pierre PROVOST Mr Karel STESSENS Mr Bart VANDENBERGHE Ms Virginie WISLEZ Ms Durkadin YILMAZ	Director

The representatives of the Regions on the Board of Directors, appointed pursuant to the Royal Decree dated 25 April 2014 on the representation of the Regions on the Boards of Directors of Infrabel and SNCB and in the RER Steering Group of SNCB, are:

Mr Karel STESSENS	Brussels Region
Mr Antoine DE BORMAN	Walloon Region
Mr Herman DE BODE	Flemish Region

Their term of office ran until 31 December 2022. No new representatives have yet been appointed by royal decree, so they will continue to serve until their replacements are appointed to ensure continuity.

<u>Main positions held outside Infrabel by the non-executive directors in 2024</u>

Mr Jan CORNILLIE	Global Head Advisory Services 3E
Mr Herman DE BODE	President of MuHKA (Museum of Contemporary Art Antwerp)
Mr Antoine DE BORMAN	General Manager of Perspective.brussels
Mr Pier ERINGA	Chairman Supervisory Board Schouwburg Orpheus Apeldoorn, Chairman Stichting Open Nederland, Chairman Board of Directors Gelre ziekenhuizen Apeldoorn
Ms Anne-Sophie GILLAIN	Head of the financial division of the Government Buildings Agency, the Régie des bâtiments
Mr Ruben LECOK	Director of the General Policy Unit of the Prime Minister
Ms Brigitte PINTE	Advisor in the Mobility, Public Works and Road Safety Unit to the Office of the Minister of the Brussels-Capital Region Government, in charge of Mobility, Public Works and Road Safety
Ms Sylvianne PORTUGAELS	General Manager of CHR Citadelle hospital (Liège)

Mr Pierre PROVOST	Director of the Private Office of the Minister for Pensions and Social Integration, in charge of Disabled Persons, Poverty Alleviation and Beliris.
Mr Karel STESSENS	Retired
Mr Bart VANDENBERGHE	General Manager of OLV Residential Care Center - Assisted Living Group "De Varent"
Ms Virginie WISLEZ	Member of the Management Board of Opérateur de Transport de Wallonie
Ms Durkadin YILMAZ	Senior Sustainable Energy Project Manager at Storm

APPOINTMENT OF THE DIRECTORS

Except for the two directors who meet the criteria set in Article 7:87 §1 of the Companies Code and who were appointed by the General Meeting, His Majesty the King appoints the directors under a decree adopted by the Cabinet.

Directors are selected on the basis of the complementary nature of their skills in the fields of finance and accounting, legal affairs, knowledge of the transport sector, expertise in mobility, human resources policy and industrial relations.

The Board of Directors consists of three representatives of the regional authorities, on the understanding that

1. one member is appointed by His Majesty the King based on the proposal of the Government of the Flemish Region;
2. one member is appointed by His Majesty the King based on the proposal of the Government of the Walloon Region; and
3. one member is appointed by His Majesty the King based on the proposal of the Government of the Brussels-Capital Region.

OPERATION

In 2024, the Board of Directors met 10 times.
The Board's powers are defined in Article 17 of the Act dated 21 March 1991:
"§ 1. The Board of Directors is authorised to carry out all actions necessary or useful to achieve the purpose of the public enterprise.
The Board of Directors oversees the management exercised by the Management Board. The Management Board reports regularly to the Board of Directors.
The Board, or its Chairman, without prejudice to the powers conferred to him/her by Article 18(5) of the Act of 21 March 1991, can at any time request a report from the Management Board on all or some of the Company's activities. "
"§ 2. The Board of Directors can fully or partially delegate to the Management Board the powers referred to in § 1, with the exception of:
1. Approval of the management contract and any amendment thereto;
2. Adoption of the business plan and definition of general policy;

3. Oversight of the Management Board, especially with regard to performance of the management contract;
4. Any other powers that are hereby reserved for the Board of Directors and, if the public enterprise has the form of a limited company under public law, by the consolidated laws on commercial companies."

DELEGATION OF POWERS

The latest version of the 'Rules on the (sub)delegation of powers and authorised signatures' was approved by the Board of Directors on Tuesday, 28 November 2023 and published in the Appendices to the Belgian Official Journal of Monday, 12 February 2024.

DECISIONS TAKEN IN WRITING

Decisions of the Board of Directors may be taken by unanimous consent of the directors expressed in writing, whose signatures are affixed either to a single document or to multiple copies thereof.

The first paragraph does not apply to the approval of the annual financial statements, the use of authorized capital, the approval of the management contract between the State and the company or any amendment to this contract or decisions requiring a notarial deed. (Article 28 of the Articles of Association)

The Board did not use this procedure during 2024.

FINANCIAL CONFLICT OF INTEREST

In 2024, the procedure laid down in Article 7:96 of the Companies and Associations Code, according to which, *"[w]hen the Board of Directors is called upon to take a decision or to decide on a transaction falling within its remit in respect of which a director has a direct or indirect interest of a proprietary nature which is opposed to the interests of the company, that director must inform the other directors before the Board of Directors takes a decision",* was not applied.

DIRECTORS' CHARTER

The 'Directors' Charter' is part of the rules of procedure of the Board of Directors. It is applicable to all members of the Infrabel Board of Directors as well as any Director appointed by Infrabel in a company.

Under the terms of this Charter, in the exercise of their duties, Directors undertake to:

1. Act independently under all circumstances;
2. Actively protect the interests of the company;
3. Ensure the efficient operation of the Board of Directors;
4. Protect the interests of all shareholders;
5. Take into account the legitimate expectations of all of the company's partners (the community, customers, executives, employees, suppliers and creditors);

6. Ensure that the company respects its obligations and commitments, the law, regulations and codes of ethics;
7. Avoid any conflict between their direct or indirect personal interests and those of the company;
8. Avoid any improper use of information or insider trading;
9. Continually develop his or her professional competencies;
10. Adhere to the spirit of the Charter.

BOARD COMMITTEES

In accordance with Articles 210 and 211 of the Act of 21 March 1991, the Board has established two committees, the Audit Committee and the Appointments and Remuneration Committee, to assist and advise the Board in the fulfilment of its duties.

2. AUDIT COMMITTEE

This Committee was created pursuant to Article 210 of the Act of 21 March 1991.

MEMBERS

The Committee is composed as follows:

Mr Pierre PROVOST	Chairman
Ms Anne-Sophie GILLAIN Mr Bart VANDENBERGHE Mr Pier ERINGA	Members

In accordance with Article 3:6 § 1(9) of the Companies and Associations Code, the annual report must demonstrate the independence and accounting and auditing competence of at least one member of the Audit Committee.

Mr Pierre PROVOST is well versed in budgeting and financial analysis, holding a degree in economics and has been in charge of socio-economic and budgetary matters in various offices at both federal and regional levels;

Ms Anne-Sophie GILLAIN has considerable expertise in financial analysis and the budgetary field, as she was in charge of budgetary matters and the accounting department of Ittre prison and was then responsible for the budget, procurement and accounting department for Belgian prisons within the FPS Justice. She was also a cabinet advisor at the federal level, in charge of monitoring budgetary matters for the Federal Public Service Mobility (including the grants to SNCB and Infrabel) within the cabinet of the Minister for the Budget. She is currently head of the financial division of the Government Buildings Agency (the Régie des bâtiments).

Mr Bart VANDENBERGHE, a commercial engineer by training, has all the skills required in the field of budgeting and financial analysis given, on the one hand, his training as a commercial engineer and, on the other hand, the experience he has acquired as a university advisor in matters of finance and budget at the Chamber of Representatives, Cabinet Director to the Secretary of State for the Coordination of the fight against fraud, Vice President of the College for the fight against tax and social security fraud, Secretary of the Ministerial Committee for the fight against tax and social security fraud and, finally, as Government Commissioner for the Budget in the National Lottery.

Mr Pier ERINGA was CEO of Transdev Nederland and previously President and Director of ProRail, the Dutch public organisation in charge of the management of the national railway infrastructure. He also worked for the Dutch railways. As a result, he has acquired financial management skills through his extensive experience.

The Audit Committee may invite the Chief Executive Officer to attend its meetings in an advisory capacity. Government Commissioners also attend Audit Committee meetings in an advisory capacity.

The Audit Committee may likewise invite any competent person to assist it in performing the tasks assigned to it by the Board of Directors.

OPERATION

The Committee met five times in 2024.

RESPONSABILITIES

The Audit Committee carries out the tasks entrusted to it by the Board of Directors. Moreover, its mission is to assist the Board of Directors by scrutinising financial information, specifically the annual accounts, the management report and interim reports. The Committee also ensures the reliability and integrity of financial reports for risk management.

The Board of Directors submits the financial statements to the Audit Committee for examination at least a fortnight prior to the meeting at which the Board approves the annual financial statements.

The powers of the Audit Committee are defined in Article 7 of the Audit Committee Charter, the latest amendment to which was approved by the Board of Directors on 25 June 2024. The Audit Committee assists the Board of Directors and, in particular, carries out the following activities (non-exhaustive list):

1. Risk management, internal control and compliance

- Evaluating the efficiency and effectiveness of risk identification, assessment, management and reporting systems.
- Evaluating the efficiency and effectiveness of the internal control system.
- Evaluating procedures for fraud prevention and detection, asset protection and abuse prevention.
- Evaluating the efficiency and effectiveness of the systems introduced to ensure compliance with laws, decrees, orders, regulations, and directives from the authorities, as well as internal regulations and procedures.
- Evaluating the performance management system.

2. Financial reporting

- Examining and commenting on the draft annual financial statements, half-yearly results and, where applicable, quarterly results before submitting them to the Board of Directors.
- At least a fortnight prior to the meeting at which the Board of Directors approves the annual financial statements, the Board submits these financial statements to the Audit Committee for examination.
- Ensuring the integrity of financial information and the relevance, consistency and sustainability of the accounting principles and rules used to prepare the accounts, and discloses any breaches of these rules.
- Ensuring compliance with accounting regulations.

3. Internal Audit

- Examining and approving the audit programme drawn up by the Head of Internal Audit.
- Ensuring the independence and objectivity of Internal Audit. Functionally, the Head of Internal Audit reports directly to the Audit Committee and administratively to the CEO. Before each

Audit Committee meeting, the Head of Internal Audit meets the Chairman of the Audit Committee in person. The Head of Internal Audit may contact the Chairman of the Audit Committee at any time.

- Reviewing and examining the conclusions and main recommendations set out in assurance reports.
- Reading consultancy assignments reports.
- Monitoring the implementation of recommendations accepted by management.
- Evaluating the internal audit function.
- Approving Infrabel's Internal Audit structure, budget, staffing and material support.
- Submitting to the Board of Directors a reasoned opinion on the appointment and replacement of the Head of Internal Audit at Infrabel after consulting the Appointments and Remuneration Committee;
- Approving, jointly with the CEO and the Head of Internal Audit, the Internal Audit Charter.

4. External audit

- Examining the reports drawn up by the Board of Auditors (certification of the annual financial statements and reports to the Board of Directors on compliance with public procurement regulations).
- Studying the nature, quality and scope of the Board of Auditor's activities.
- Examining the conclusions arising from the activities of the Board of Auditors (the management letter).
- Submitting to the Board of Directors a reasoned opinion on the appointment or reappointment of Infrabel's auditors, as well as on their fees.
- Ensuring the independence of the Auditors.

5. Non-audit services

- Authorising a member of the College of Commissioners or a member of its network to take part in a procedure for awarding non-audit service assignments. The Board of Directors is informed of the Audit Committee's decision via the reports referred to in point 8 of this charter.

3. APPOINTMENTS AND REMUNERATION COMMITTEE

The Appointments and Remuneration Committee was established pursuant to Article 211 of the Act of 21 March 1991.

MEMBERS

The Committee is composed as follows:

Mr Jan CORNILLIE	Chairman
Mr Benoît GILSON	Members
Ms Sylvianne PORTUGAELS	
Mr Ruben LECOK	

OPERATION

The Committee met twice in 2024.

RESPONSABILITIES

The Committee gives its opinion on applicants put forward by the Chief Executive Officer for appointment as members of the Management Board.

It submits proposals to the Board of Directors regarding remuneration and benefits provided to members of the Management Board and senior executives. These matters are constantly monitored by the Appointments and Remuneration Committee (Article 211 §2 of the Act of 21 March 1991).

Furthermore, it performs the tasks entrusted to it by the Board of Directors.

4. MANAGEMENT BOARD

LEGAL BASIS

The Companies and Associations Code (CSA) provides for the expansion of the dual governance structure for public limited companies and the simultaneous abolition of the Management Board as regulated by law. At the time of the next amendment to the Articles of Association, which must take place by 1 January 2023, at the latest, public limited companies must choose between two governance structures: the monistic structure and the dual structure, with a Management Board and a Supervisory Board.

At the Extraordinary General Meeting of 18 May 2022, Infrabel brought its Articles of Association into line with the Companies and Associations Code (CSA)[8]. However, Infrabel's General Meeting did not make the aforementioned choice, as Infrabel, as a public company, is subject to the sui generis regulations laid down in the Act of 21 March 1991 and must, therefore, retain the structure provided for in this law. This also implies the existence of a Management Board. This is why it is expressly stipulated in the Articles of Association that the Management Board was created in accordance with Articles 19 and 20 of the Act of 21 March 1991, on the reform of certain economic public companies.

MEMBERS

The Management Board is composed as follows:

Mr Benoît GILSON	Chief Executive Officer
Mr Jochen BULTINCK	Chief Operation Officer
Ms Ann BILLIAU	Chief Client Officer
Ms Christine VANDERVEEREN	Chief Financial Officer

RULES GOVERNING THEIR APPOINTMENT AND DISMISSAL

The Directors-General are appointed by the Board of Directors, following the recommendation of the Chief Executive Officer and after consultation with the Appointments and Remuneration Committee. They are dismissed by the Board of Directors" (Article 208 of the Act dated 21 March 1991).

OPERATION

The Management Board met 34 times in the course of 2024. There were also 4 written procedures.

RESPONSABILITIES

In accordance with Article 208 of the Act of 21 March 1991, " *§1. The Management Board is responsible for the day-to-day management and representation with regard to this management, as well as for the implementation of the decisions of the Board of Directors.*

[8] This amendment to the bylaws was approved by a Royal Decree presented to the Council of Ministers on 19 March 2023 (*M.B.*, 11 April 2023)

The members of the Management Board form a collegiate body. They may allocate tasks among themselves. ”

REPRESENTATION

In accordance with Article 208 of the Act of 21 March 1991, the company is duly represented in its actions, including any legal proceedings, by the Chief Executive Officer and the Director-General appointed for that purpose by the Board of Directors, acting jointly.

Any acts of management or acts which are binding upon the Company are jointly signed by the Chief Executive Officer and the Director-General appointed for that purpose by the Board of Directors.

This Director must have a different linguistic background from the Chief Executive Officer.

By Royal Decree deliberated upon in the Cabinet Meeting, His Majesty the King may determine any acts that require different approval than that set out in this article.

On 16 December 2019, the Board of Directors appointed, as of 1 January 2020, Mr Jochen BULTINCK as a member of the Management Board who, in accordance with Article 208 § 4 of the Act dated 21 March 1991 relating to the reform of certain public economic companies, represents Infrabel, together with the CEO, with regards to third parties and in court, and who, in this capacity, co-signs all management acts or acts that bind the company.

DECISION-MAKING PROCEDURE

The decisions of the Management Board are prepared by the Executive Committee. This is an informal meeting attended by other Infrabel directors, as well as members of the Management Board.

- Ms Anna Marlene KLOMPENHOUWER, Chief Procurement, Production & Supply Chain
- Mr Eric MERCIER, Chief Digital Officer
- Ms Lucia VAN LAER, Chief Strategy, Innovation, Communication & Public Affairs Officer
- Mr Nico VAN WIJK, Chief Talent Officer

5. SUPERVISION

GOVERNMENT COMMISSIONERS

Government Commissioners are invited to all meetings of the Board of Directors and of the Management Board and attend in an advisory capacity (Article 213 § 3 of the Act of 21 March 1991). The Government Commissioners also attend, in an advisory capacity, the meetings of the Audit Committee (Article 210 § 1 of the Act of 21 March 1991).

They ensure compliance with the law, the Articles of Association and the management contract. They ensure that Infrabel's policy, particularly the policy implementing Article 13 of the Act dated 21 March 1991, does not jeopardise the implementation of its public service missions (Article 213 § 2 of the Act of 21 March 1991).

All such decisions are suspended while the recourse procedure is underway. The Government Commissioners report to the Minister for the Budget on all decisions of the Board of Directors or the Management Board that have an impact on the general State expenditure budget (Article 213 § 2 of the Act of 21 March 1991).

Each Government Commissioner may, within a period of four working days, exercise a right of recourse to the minister to whom they are responsible in order to object to any decision of the Board of Directors or the Management Board that they consider to be in breach of the law or the company's Articles of Association or the management contract, or of a nature likely to jeopardise the implementation of Infrabel's public service missions. Each Government Commissioner may, within the same period, exercise the same recourse against any decision to increase the fees payable for the use of the railway infrastructure. The appeal has a suspensive effect (Article 213 § 4 of the Act of 21 March 1991).

The Government Commissioners at Infrabel were:

Ms Tanja BRUYNSEELS	appointed by Royal Decree on Thursday 20 October 2022 (from 25/10/2022)
Mr Kurt VAN RAEMDONCK[9]	appointed by Royal Decree on 24 December 2020

REMUNERATION

The Act of 21 March 1991 (Article 213 § 1) provides that His Majesty the King determines the remuneration of Government Commissioners. Infrabel is responsible for this remuneration. It was set by Royal Decree dated 4 July 2008.

For the financial year 2024, the following remuneration was paid:

- The total indexed lump sum portion amounts to € 4,643.31, paid as follows:

[9] Ms Goele JANSSEN has been appointed Alternate Government Commissioner (Royal Decree dated 24/12/2020, MB 31/12/2020)

- from January to May (=X2.0399), € 382.48 gross/month;
- from June to December (=X2.0807), i.e. € 390.13 gross/month

- The index-linked variable component amounts to € 9,286.65 gross/year, paid pro rata for attendance at meetings of the Board of Directors.

	Fixed	Variable	Total
Ms Tanja BRUYNSEELS Government Commissioner	€ 4,643.31	€ 9,286.70	€ 13,930.01
Mr Kurt VAN RAEMDONCK Government Commissioner	€ 4,643.31	€ 8,358.03	€ 13,001.34

COLLEGE OF COMMISSIONERS

Article 25 §1 of the Act of 21 March 1991 specifies: "The audit of the financial situation, of the annual financial statements and the regularity, from the viewpoint of the law and the Articles of Association of the activities to be recorded in the annual financial statements, shall in each autonomous public company be delegated to a Board of Auditors numbering four members. The members of the Board of Auditors bear the title of Commissioner."

This Board shall be made up of four members, two of whom are appointed by the Court of Auditors from its own members and the other two by the General Meeting from members of the Institute of Company Auditors.

On the recommendation of the Board of Directors on 20 December 2022, and the Strategic Company Committee on 15 March 2023, the Annual General Meeting of 17 May 2023, approved the appointment of KPMG Bedrijfsrevisoren and BDO Bedrijfsrevisoren, represented respectively by Mr Tanguy LEGEIN and Mr Michaël DELBEKE, as statutory auditors to audit the statutory and consolidated financial statements for the years 2023, 2024 and 2025. Their term of office runs until the Annual General Meeting of 2026.

Their mandate is part of the legal task of the external audit of Infrabel's statutory and consolidated financial statements.

The members of the Board of Auditors are:

KPMG	Represented by Mr Tanguy LEGEIN
BDO	Represented by Mr Michaël DELBEKE
Mr Pierre RION and Mr Rudi MOENS	Advisers at the Court of Auditors

6. OFFICES HELD IN SUBSIDIARIES AND ASSOCIATED COMPANIES

The members of the management bodies and the staff of the Company held office during 2024 in the companies, groupings and organisations in which the company has a shareholding or to whose operation it contributes and where these persons were appointed on its proposal.

MEMBERS OF MANAGEMENT BODIES OR MEMBERS OF INFRABEL'S STAFF WHO HAVE HELD OFFICE

Ms Ann BILLIAU	Director TUC RAIL
Mr Michaël DIERICKX	Chairman EEIG Rail Freight Corridor North Sea-Mediterranean, Full Member (permanent representative) EIM, Full Member (permanent representative) Voka, Full Member (permanent representative) Voka Metropolitan, Full Member (permanent representative) UWE, Full Member (permanent representative) BECI
Mr Jochen BULTINCK	Vice-Chairman TUC RAIL, Chairman CCB until 16 December 2024, Chairman Woodprotect Belgium until 16 December 2024
Ms Christine VANDERVEEREN	Director TUC RAIL, Chairwoman SPV 162, Chairwoman SPV Zwankendamme, Chairwoman SPV Brussels Port, Director (permanent representative) Rail Facilities, Director (permanent representative SPS Fin, Director (permanent representative) Greensky, Director CCB UNTILE 16 December 2024, Director Woodprotect Belgium until 16 December 2024
Mr Eric MERCIER	Director TUC RAIL
Ms Cecilia MAES	Director SPV Zwankendamme, Director SPV 162, Director SPV Brussels Port
Mr Koen DE WITTE	Director SPV Zwankendamme, Director SPV 162, Director SPV Brussels Port, Director CCB until 16 December 2024, and Director Woodprotect Belgium until 16 December 2024
Mr Michel GEUBELLE	Director of the Rhine-Alpine Corridor EEIG, Member of the Management Board of the North Sea-Mediterranean Rail Freight Corridor EEIG, Director of the North Sea-Baltic Rail Freight Corridor EEIG, Vice-Chairman of RailNetEurope.
Mr Benoît GILSON	Chairman TUC RAIL, Director (permanent representative) Liège-Carex, Director HR Rail, Director GEIE Rail Freight Corridor North Sea-Mediterranean
Mr Pierre DELSEMME	Director of CCB until 16 December 2024, Director of Woodprotect Belgium until 16 December 2024
Mr Marc WAEYENBERGH	Director CCB until 16 December 2024, Director Woodprotect Belgium until 16 December 2024, Director (permanent representative) BE-CERT
Mr Didier VAN DE VELDE	Director (permanent representative) BENOR, Director (permanent representative) OCAB-OCBS, Director (permanent representative) PROBETON Director (permanent representative) PROCERTUS

Ms Corine ATHAS	Full member (permanent representative) Be.Face, Full member (permanent representative) The Shift
Ms Jolien DE TROCH	Full member (permanent representative) CERRE
Mr Alain FAYT (until 30 June 2024) Mr Vincent BOURGOIS (from 1st July 2024)	Full member (permanent representative) BEWAG, Full member (permanent representative) Agence Ecosphère
Mr Hans MENSCHAERT	Full member (permanent representative) of the EEIG ERTMS Users Group

GOVERNANCE CHARTER FOR SUBSIDIARIES

The Governance Charter for subsidiaries is intended for Infrabel's representatives in its subsidiaries. It ensures the right of Infrabel shareholders to information about its subsidiaries, sub-subsidiaries and shareholdings.

THE KEY POINTS OF THE CHARTER ARE:

INFRABEL HAS A RIGHT TO AUDIT THE RUNNING OF ITS SUBSIDIARIES, SUB-SUBSIDIARIES AND SHAREHOLDINGS, BUT IT MAY NOT INTERFERE IN THEIR INTERNAL ORGANISATION OR MANAGEMENT OF THEIR AFFAIRS; THEIR INDEPENDENCE MUST BE RESPECTED AT ALL TIMES;

INFRABEL'S RIGHT OF INSPECTION REFERRED TO IN THE PREVIOUS PARAGRAPH DOES NOT GO BEYOND THE EXPLICIT TERMS OF THE COMPANIES CODE, LEGAL DOCTRINE OR CASE LAW;

GUIDELINES CONCERNING THE STATUS OF INFRABEL'S REPRESENTATIVES WHEN HOLDING OFFICE IN A SUBSIDIARY, SUB-SUBSIDIARY OR COMPANY IN WHICH INFRABEL HOLDS SHARES, HOW THEY ARE CHOSEN WITHIN INFRABEL, WHAT IDEAS THEY ARE ASKED TO CONVEY TO THE MANAGEMENT BODIES IN WHICH THEY REPRESENT INFRABEL OR EVEN HOW INFORMATION IS COMMUNICATED BETWEEN INFRABEL, ITS SUBSIDIARIES, SUB-SUBSIDIARIES OR SHAREHOLDINGS;

IF COMMITTEES HAVE BEEN SET UP IN INFRABEL'S SUBSIDIARIES, SUB-SUBSIDIARIES OR COMPANIES IN WHICH IT HOLDS AN INTEREST, THE INFORMATION WILL BE REPORTED TO INFRABEL BY THEIR INTERMEDIARY.

INFRABEL'S REPRESENTATIVES AGREE TO COMPLY WITH THE CHARTER BY COMPLETING AND SIGNING A DECLARATION TO THIS EFFECT. THE ORIGINAL IS SENT TO THE LEGAL AFFAIRS DEPARTMENT.

Infrabel's Legal Affairs Department is the 'custodian' of the Charter in order to ensure its coherent application, uphold its principles and ensure its consistent interpretation and observance.

REMUNERATION

All the above-mentioned mandates are unremunerated for the above-mentioned natural persons.

REMUNERATION REPORT

0. REMUNERATION POLICY

Remuneration policy for Directors, members of the Management Board, other members of management and the persons charged with the day-to-day running of the company, and criteria for determining the individual remuneration of Directors, members of the Management Board, other members of management and persons charged with the day-to-day running of the company.

BOARD OF DIRECTORS

THE PROCEDURE FOLLOWED IS IN KEEPING WITH ARTICLE 209, §2 OF THE ACT OF 21 MARCH 1991 ON THE REFORM OF CERTAIN ECONOMIC PUBLIC ENTERPRISES:

"The General Meeting determines the remuneration of the members of the Board of Directors based on the proposal of the Appointments and Remuneration Committee. "

MANAGEMENT BOARD

THE PROCEDURE FOLLOWED IS IN KEEPING WITH ARTICLE 211, §2, 2 OF THE ACT OF 21 MARCH 1991 ON THE REFORM OF CERTAIN ECONOMIC PUBLIC ENTERPRISES:

"The Board of Directors, based on the proposal submitted by the Appointments and Remuneration Committee, determines the remuneration and the benefits granted to the members of the Management Board and senior executives. The Board continuously monitors these matters. "

REMUNERATION POLICY AS APPLIED DURING THE FINANCIAL YEAR REVIEWED IN THE ANNUAL REPORT.

BOARD OF DIRECTORS

The remuneration paid to the Chairman is composed of a fixed annual component of € 27,200 and a variable component consisting of attendance fees.
These attendance fees amount to:

- € 500 per Board meeting;
- € 400 per Committee meeting attended.

In addition, the Chairman receives an annual fee of € 2,400 covering operating expenses and enjoys free rail travel in Belgium.
The remuneration paid to other Directors (with the exception of the CEO) is composed of a fixed annual component of € 13,600 and a variable component consisting of attendance fees.
These attendance fees amount to:

- € 500 per Board meeting;
- € 400 per meeting of the other Committees.

In addition, the Chairman receives an annual fee of € 1,200 covering operating expenses.
Attendance at meetings is required to qualify for attendance fees.

CHIEF EXECUTIVE OFFICER

As compensation for holding office, the CEO receives a set remuneration and a monthly fee, a holiday allowance, an annual bonus and a variable management bonus.
Remuneration is consistent with the agreements made with the supervisory body in 2014, namely € 230,000 of fixed remuneration and a maximum € 60,000 of variable remuneration per year. These amounts are index-linked.

MANAGEMENT BOARD

As compensation for holding office, the Directors-General receive a set remuneration and a monthly remuneration, a holiday allowance, an annual bonus and a variable management bonus.
Remuneration is consistent with the agreements made with the supervisory body in 2014, namely € 180,000 of fixed remuneration and a maximum € 50,000 of variable remuneration per year. These amounts are index-linked.
Infrabel will pay any expenses incurred by the Directors General and the CEO in the exercise of their duties.
Infrabel will bear the cost of insurance premiums for insurance cover at market rates for liability while carrying out the duties of a member of the Management Board and the Chief Executive Officer.

We do not foresee any changes to the remuneration policy for the next two financial years.

RECOVERY PROVISIONS

The contract does not contain any provisions about the right of recovery of variable remuneration from members of the Management Board in favour of the company in the event that said remuneration was granted based on incorrect financial data.
As the KPIs for determining financial remuneration do not depend on financial information in the main, it is not considered necessary to adopt such a provision.

I. TOTAL REMUNERATION

REMUNERATION OF DIRECTORS AND OTHER BENEFITS OF NON-EXECUTIVE DIRECTORS AND EXECUTIVE MANAGERS IN THEIR CAPACITY AS MEMBERS OF THE BOARD OF DIRECTORS FOR THE

FINANCIAL YEAR REVIEWED IN THE ANNUAL REPORT

Name	Rate of Attendance at meetings of Infrabel's Board of Directors and Committees			(Gross) Remuneration of directors
	Board (total: 10 in total)	Audit Committee (total: 5 in total)	Appointments and Remuneration Committee (total: 2 in total)	Board and other Committees (€)
Jan CORNILLIE	10/10		2/2	€ 33,000.04
Herman DE BODE	5/10			€ 16,099.96
Antoine DE BORMAN	9/10			€ 18,099.96
Pier ERINGA	5/10	0/5		€ 16,099.96
Anne-Sophie GILLAIN	10/10	5/5		€ 20,599.96
Ruben LECOK	9/10		2/2	€ 18,899.96
Sylvianne PORTUGAELS	10/10		2/2	€ 19,399.96
Brigitte PINTE	9/10			€ 18,099.96
Pierre PROVOST	9/10	5/5		€ 20,099.96
Karel STESSENS	10/10			€ 18,599.96
Bart VANDENBERGHE	10/10	5/5		€ 20,599.96
Virginie WISLEZ	9/10			€ 18,099.96
Durkadin YILMAZ	8/10			€ 17,599.96

Annual remuneration and attendance fees are only paid to non-executive directors. The CEO does not receive any remuneration for his role as a member of the Board of Directors.

ASSESSMENT CRITERIA FOR PERFORMANCE-BASED REMUNERATION OF EXECUTIVE MANAGERS.

Based on a proposal by the Appointments and Remuneration Committee, the Board of Directors meeting on 28 February 2023 approved the new calculation methodology for assessing the 2023 objectives of the CEO and the members of the Management Board. This new methodology is directly linked to the new indicators in Infrabel's Performance Contract, validated by the Board of Directors on 20 December 2022, and approved by the government on 23 December 2022. (See: Royal decree holding approval of the Performance Contract concluded between the State and public limited company Infrabel, *M.B.*, 10 January 2023)
On 28 November 2023, the Board of Directors, acting on a proposal from the Appointments and Remuneration Committee, adopted the same indicators for 2024.
Of the 15 indicators in the Performance Contract, 12 are eligible for the 2023 Performance Management targets. The same target values are used as in the performance contract, with progressive objectives proposed for each year.
A simplified weighting is proposed, with each indicator having the same weight, i.e. 1/12th of the total.

Category	ID	Name	Weighting
	S.IP1	Safety of the passengers	

Safety	S.PI2	Safety of Infrabel's staff	3/12
	S.PI3	ETCS network equipment rate (in 2028: from PI to II)	
Customer relations	CR.PI1	Customer satisfaction	2/12
	CR.PI2	Freight customer satisfaction	
Capacity	C.PI1	Rate of on-time publication of the first version of train path adaptation bulletins (in 2028: from PI to II)	1/12
Punctuality	P.PI2	Minutes of delay attributed to Infrabel - passenger transport	2/12
	P.PI3	Minutes of delay attributed to Infrabel - freight transport	
CSR	CSR.PI1	Carbon footprint reduction	1/12
Asset management	AM.PI2	Speed restriction indicator because of poor infrastructure condition	1/12
Finance	F.PI.1	Investment completion rate	2/12
	F.PI.2	Compliance with operating budget	

The three indicators not retained are:

Punctuality	P.IP1	Joint punctuality rate (with SNCB)	This indicator depends too much on the partial responsibility of SNCB and will, therefore, not be retained.	0
Asset management	AM.IP1	Substance measurement rate	At its meeting on 26 November 2024, the Board of Directors decided to apply this indicator from performance management for 2025.	0
Accessibility	A.PI1	Number of autonomously accessible stations (with SNCB)	The “Accessibility” indicator is too dependent on SNCB's partial responsibility and is therefore not included.	0

With the integration of the additional Asset Management indicator in 2025, when in performance mode, the weighting of each indicator would evolve towards 1/13.

At the mid-term review (2028) of the performance contract, a new evaluation will be carried out at a later date, depending on the validation of new performance indicators and the disappearance of current indicators.

For each indicator, a progressive score between 0 and 3 will be defined according to the performance achieved around the Target and Remediation values.

The final score is determined by the sum of the scores for each indicator. This KPI-related percentage will account for 80% of the total performance measurement, with 20% remaining discretionary.

For the other members of the management, Heads of, Managers and high-level experts, the new GOALS evaluation system is aligned with the method used for the members of the Management Board and also enters elements specific to the result area of each member of the management.

On an individual basis and in relation to the financial year covered by the management report: remuneration is paid to the CEO.

REMUNERATION OF THE CEO FOR THE FINANCIAL YEAR COVERED BY THE ANNUAL REPORT

Name	Benoit Gilson
Status	The provisions of Article 209 of the Act dated 21 March 1991 concerning the members of the Management Board (Section 6) also apply to the CEO.
Fixed remuneration[10]	€ 295,447.23 gross allowance
Variable remuneration	€ 77,618.74 (for the period from 1st January 2024 to 31st December 2024 and to be paid in 2025)
TOTAL	€ 373,065.97 gross remuneration
Fixed/variable ratio	79.19 % fixed and 20.81% variable
Pension	The specific agreement provides for group insurance that is in force as standard in the insurance regulations that apply to contractually employed senior executives of SNCB. Employer's contribution paid in the year of performance: € 34,454.66 [11]
Other benefits	Company car for € 4,091.07
Exceptional components	None
Long-term cash bonus paid to the CEO for the financial year	None

On an overall basis and in relation to the financial year covered by the annual report, the remuneration is paid to the other members of the executive management.

THE MEMBERS OF THE EXECUTIVE COMMITTEE, WITH THE EXCEPTION OF THE CEO

Status	The members of the Management Board may be employed under a contract or statutory appointments. Pursuant to Article 209 of the Act of 21 March 1991, the rights, including remuneration and responsibilities of the CEO and other members of the Management Board, on the one hand, and Infrabel, on the other, are governed by a specific agreement between the parties. For the statutory appointees, for the duration of his/her mandate, this specific agreement envisages that the Director-General is entitled to unpaid leave, maintaining his/her rights to promotion, advancement and a pension. In accordance with the HR rules defined by HR Rail, the members retain their grade

[10] Fixed remuneration = salary + function allowance + bilingual bonus + annual bonus + vacation pay
[11] Theoretical calculation of the premium paid in 2024, on the basis of an estimate of the annual reference salary for 2023; this premium will be adjusted when the insurer makes a statement at the annual expiry of the contract on the basis of the final salaries for 2024.

	and are assigned the position of Director-General. For contractual members, this specific agreement provides, for the duration of his/her term of office, for the suspension of the open-ended employment contract that was in force before the appointment as a member of the Management Board. On expiry of the term of office, the employment contract immediately comes back into force.
Fixed remuneration[12]	€ 723,906.87 gross remuneration
Variable Remuneration	€ 194,046.84 (for the period from 1st January 2024 to 31st December 2024 and to be paid in 2025)
TOTAL	€ 917,953.71
Fixed/variable ratio	78.86 % fixed and 21.14 % variable
Pension	For statutory members: No supplementary pension. No group insurance is provided either. In the event of retirement or death during or after service, the salary which serves as the basis for calculating the retirement pension (or survivor's pension) of the person who holds or has held the position of Director-General will be determined as follows: in the month prior to retirement or the month of death in service, a salary will be allocated that takes account of the length of service, both in more junior positions and as Director-General; and that consequently comprises the sum of two separate amounts: a. an amount equal to the final annual salary level earned in the more junior position by the person in question at the moment of his/her retirement (or death in service), multiplied by a fraction whose denominator represents the total number of years' service and whose numerator represents the same number of years, not taking account of the services rendered as Director-General; b. an amount equal to the final annual salary level earned in the more junior position by the person in question at the moment of his/her retirement (or death in service), multiplied by a fraction whose denominator represents the total number of years' service and whose numerator represents the same number of years, not taking account of the services rendered as Director-General; For the contractual staff members: The specific agreement provides for a group insurance that applies as standard in the insurance rules that apply to contractually-employed senior executives of SNCB.

[12] Fixed remuneration = salary + function allowance + bilingual bonus + annual bonus + vacation pay

Employer’s contribution paid in the year of performance: € 31,256.25 [13]

Other benefits	Company car as a benefit in kind with a value of € 9.395,38
Exceptional components	None
Long-term cash bonus	None

II. SHARE-BASED PAYMENT

On an individual basis:
Number and key characteristics of the share options exercised or lapsed share options or other rights to acquire shares of the various executive managers (including the CEO) within the accounting period.
Nil.

[13] Premiums paid in 2024, calculated on the basis of an estimate of the annual reference salary for 2023; they will be adjusted when the insurer makes a statement at the annual expiry of the contract on the basis of the final salaries for 2024.

III. SEVERANCE PAYMENTS

KEY PROVISIONS OF THE CONTRACTUAL RELATIONSHIP CONCERNING SEVERANCE PAY, AGREED WITH THE CEO

Contractual relationship with Mr Benoît GILSON:

The specific agreement setting out the reciprocal rights and responsibilities between Infrabel and Mr Benoît GILSON as CEO provides for no severance pay. In the event of termination of the mandate, the conditions set out in the employment contract signed on 24/06/2005 will once again apply.

KEY PROVISIONS OF THE CONTRACTUAL RELATIONSHIP CONCERNING SEVERANCE PAYMENT, AGREED WITH THE CEO AND EACH OF THE OTHER EXECUTIVE MANAGERS.

The new specific agreement setting out the reciprocal rights and responsibilities between Infrabel, HR Rail and the Director-General, approved by the Board on 25 March 2014, envisages the following in relation to severance pay:

In the event of resignation during the mandate of the Director-General or should this mandate not be renewed, he/she will be re-employed at the rank of director; from then on, he/she will be paid according to the salary conditions linked to this rank.

In the event of termination of the term of office before its normal expiry date as a result of dismissal by the Board of Directors, and unless deemed unfounded by the Board of Directors in view of the disciplinary rules and jurisprudence applied by HR Rail, the person concerned will retain the financial conditions associated with the position of Director-General for twelve months from the date of terminating the office and thereupon will be downgraded to executive, and receive the corresponding remuneration.

IV. USE OF RECOVERY RIGHTS

Nil.

V. DEVIATION FROM THE REMUNERATION POLICY

No decision regarding a deviation from the remuneration policy was taken in 2024.

VI. EVOLUTION OF THE COMPANY'S REMUNERATION AND PERFORMANCE

[14] All gross amounts liquidated to staff are taken into account, except for compensation in lieu of notice. As far as personnel numbers are concerned, only those with a full year's remuneration are taken into consideration.
For a year to be considered complete, the annual bonus, holiday pay, productivity and/or management bonuses must have been paid.
This excludes those recruited during the reference year and those who did not receive payments for the aforementioned items:
- The outstanding balance of the annual bonus;
- Holiday bonus;
- Management bonuses.

[10] Non-statutory workers are also excluded from the calculation, as their holiday pay is paid by the ONVA.
For non-statutory staff, the FTE values have been adjusted for months of unpaid absence due to illness.
The members of the Executive Committee are excluded from all calculations (including the calculation of the average of the 10 personnel numbers with the highest gross amounts).
